Annex 1. SPPM Country Profiles

The attached Country Profiles sheets provide for all Member States a snapshot of progress towards the national 2030 poverty and social exclusion target, trends in the main social indicators for each country, and the main, priority social challenges and good social outcomes identified for each country.

Notes:

1. Figures reflect the data available at the end of June 2024 unless otherwise indicated.
2. Definitions of variables are provided in the “Definitions and data sources” section at the end of the main report.
3. The data on trends in take-up of selected benefits are collected via the SPC. The data includes only a selection of benefits which are considered most reactive to crises. The number of unemployed (standard definition by the ILO) are given as background.
4. Concerning the Key Social Challenges and Good Social Outcomes tables:
 - The assessment of the key social challenges and good social outcomes within EU Member States is based on a full analysis of all the indicators in the social policy area of the Joint Assessment Framework tool (using EU-SILC 2023 data), not only those included in the table.
 - The assessment of changes in the impact of social transfers on poverty reduction is only included when the change over the latest three years shows an increase or a decrease. The assessment is purely descriptive as changes can (among other causes) be driven by underlying developments in the labour market and income distribution, as well as by changes in benefit systems themselves (benefit levels and targeting).
 - The numbers in square brackets (e.g. [3]) refer to the categories of messages resulting from the analysis and used as a basis for determining KSCs and GSOs, based on the 5 x 5 two-way table in the main report section describing the SPPM methodology used for the identification of Member States' key social challenges and good social outcomes.
 - The identification of non-JAF challenges – reported in italics - is part of the qualitative step of the assessment and it is based on expert knowledge from country analysis and relevant literature. The aim is to complement and qualify the findings and deepening the understanding of the challenges identified by the first-step quantitative screening. Qualitative data available from reputable sources (e.g. OECD Reports, EUROFOUND, the Expert Network for Analytical Support in Social Policies, EU Agency for Fundamental Rights' (FRA), Academic Network of European Disability Experts, and other indicators from the Portfolio of EU Social Indicators of the SPC Indicators Sub-Group) are used to complement the JAF-based KSCs and GSOs with additional country-specific evidence.

BELGIUM

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 279,000 by 2030, and of children at risk of poverty or social exclusion by 93,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Notes:

i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, SMSD and Child AROPE; 2019-2023 change not significant for AROPE and SMSD.

Poverty and social exclusion of persons with disabilities	At risk of poverty or social exclusion for persons with disabilities (% of people with disabilities above 16 years)	32.0	35.5	33.3	33.8	32.1	-1.7 pp	0.1 pp	28.8	0.0 pp	-0.5 pp
Access to decent housing	Housing cost overburden rate	8.4	7.8	7.5	7.7	7.7	0.0 pp	-0.7 pp	8.9	0.2 pp	-0.5 pp
Evolution in real household disposable income	Real change in gross household disposable income (in %)	2.7	1.2	2.3	-1.9	0.0	-1.9 %	1.7 %	1.1	0.0 %	2.4 %

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES
BELGIUM 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The rates of people living in (quasi-)jobless households (aged 0-64 and in working age 18-64) are worse than the EU average with some positive development [4]</p> <p><i>Social inclusion of persons with disabilities remains a challenge.</i></p> <p><i>There is a high risk of poverty and social exclusion among non-EU born people.</i></p> <p><i>Regional disparities in poverty and social exclusion are high.</i></p>	<p>The risk-of poverty or social exclusion for children (aged 0-17) is better than the EU average with substantial positive development [8]</p> <p>The risk of poverty rates for total population and children, also when living in quasi-jobless households, are better than the EU average with positive development [7] and are substantially better for the working age population [3].</p> <p>The relative median poverty risk gap is substantially better than the EU average [3]</p> <p>The income interquintile S80/S20 and S50/S20 ratios are substantially better for working age population [3] than the EU average.</p>
2. Effectiveness of social protection	<p><i>Children from a disadvantaged socioeconomic background face a high risk of inequality of opportunities</i></p>	<p>The impact of social transfers (excluding pensions and including pensions [3 and 7]) in reducing poverty is substantially better than the EU average for the general population and also for the working age population [3 and 3]</p> <p>At-risk-of poverty rates of children living in household at work ($0.2 < WI \leq 0.55$) and in very low work intensity are better than the EU average with some positive development [7]</p> <p>The relative median poverty risk gap (18-64) is substantially better than the EU average [3]</p>
3. Pensions	<p>The median relative income of older people (65+) is worse than the EU average [2]</p> <p>Aggregate replacement ratio (excluding other social benefits) is worse than the EU average [2]</p>	<p>The relative median poverty risk gap (65+) is substantially better than the EU average [3]</p>
4. Long-term care		
5. Health		<p>Healthy life years at 65 for men is better than the EU average and some positive development [7]</p>

BULGARIA

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 787,000 by 2030, and of children at risk of poverty or social exclusion by 197,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for Child AROPE; 2019-2023 change not significant for Child AROPE.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES
BULGARIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk of poverty or social exclusion rates, the risk of poverty rates and the severe material and social deprivation rates are worse than the EU average with substantial positive development for the total population [5] with some positive development for children [4] but no development for the working age population risk of poverty and risk of poverty or social exclusion [2].</p> <p>The at-risk of poverty rate for population living in (quasi-)jobless households is worse than the EU average [2]</p> <p>Persistent at-risk-of-poverty rates are substantially worse than the EU average for the total population, the working age population and for children [1]</p> <p><i>The at risk of poverty and social exclusion for persons with disabilities and Roma is substantially higher than that of the general population, and their active inclusion remains challenging especially in combination with high urban/rural inequalities.</i></p> <p><i>High energy poverty</i></p>	
2. Effectiveness of social protection	<p>The impact of social transfers (excluding pensions) in reducing poverty is worse than the EU average [2] and the impact of social transfers (including pensions) in reducing child poverty is worse than the EU average with some positive development [4]</p> <p>The risk-of poverty rate of the working population and children living in household in low and very low work intensity is worse than the EU average [2], substantially worse in household at work intensity between 0.2 and 0.55 [1].</p> <p>In-work poverty is worse than the EU average [2].</p> <p><i>Children from a disadvantaged socioeconomic background face a high risk of inequality of opportunities.</i></p> <p><i>Adequacy, coverage and take-up of social assistance remain limited</i></p>	
3. Pensions	<p>The risk of poverty or social exclusion and the severe material and social deprivation of older people (65+, total, men and women) are worse than the EU average with substantially positive development [5].</p> <p>Aggregate replacement ratio (excluding other social benefits) is worse than the EU average with substantially positive development [5]</p> <p><i>There is a substantial gender pension gap in old-age risk of poverty or social exclusion.</i></p>	The relative median poverty risk gap (65+) is substantially better than the EU average. [3]

4. Long-term care	<i>Insufficient access to long-term care services leads to high unmet needs</i>	
5. Health	<p>Life expectancy at birth and at 65 is worse than the EU average, substantially worse for men [1], with some positive development for 65 for the total population and women [4].</p> <p>The rates of potential years of life lost, treatable mortality and preventable mortality are substantially worse than the EU average [1]</p>	The healthy life years at birth for women indicator is substantially better than the EU average [3]

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 120,000 by 2030, and of children at risk of poverty or social exclusion by 50,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Children AROPE.

comment	Number of „social assistance beneficiaries“ represents relevant number of recipients of Allowance for Living (it doesn't include other members of a households entitled to this benefit) introduced as of 1/1/2007 under the Act No. 111/2006 Coll., on Assistance in Material Need (by the end of 2006 the system of social assistance benefits was regulated in absolutely different way, because of this fact, there is no reasonable comparability). Generally, the development of number of „social assistance beneficiaries“ reflects situation on labour market and income situation of households as well as relevant legal adjustment.
	Disability benefit
definition	Number of pensioners (disability benefits 1st, 2nd and 3rd degree)
unit	Thousands of persons
source	https://www.mpsv.cz/web/cz/informace-o-vyplaceny-ch-davkach
comment	From the beginning of 2010 the new types of disability were implemented to the social system. Currently three levels of disability are differentiated (the 1st, 2nd , 3rd) instead of the former two levels (full disability, partial disability). The 3rd level is equal to the full disability while the partial disability was split in the current 1st and 2nd level. From January 2010 all receivers of disability pension older than 65 years of age are no more implicated in the number of disability pensioners. They are implicated in the number of old age pensioners. This change is displayed in the drop of number of disability pensioners in January 2010. According to these changes, new data (starting January 2010) are being presented separately.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

CZECHIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<i>While the share of people at risk of poverty or social exclusion is comparatively low, indebtedness continues to be a problem. Poverty concentrates geographically in certain localities and affects to a higher degree vulnerable groups, in particular Roma people.</i>	<p>The risk-of poverty or social exclusion is substantially better than the EU average for the total population, children (0-17) and working age population (18-64) [3]</p> <p>The risk of poverty is substantially better than the EU average [3]</p> <p>The rate of adults (aged 18-64) not students living in (quasi-)jobless households poverty is substantially better than the EU average [3]</p> <p>The persistent at-risk-of-poverty rate is substantially better than the EU average [3] for the total population and the working age population (18-64)</p> <p>The S80/S20 ratio as well as the S50/S20 are substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p>The risk of poverty rate for population (total and working age population 18-64) living in very low work intensity households is around the EU average with substantially negative development [10]</p> <p>The relative median poverty risk gap is around (slightly below) the EU average for children and the working age population (18-64) with substantial negative development [10]</p>	In work poverty is substantially better than the EU average [3]
3. Pensions	<p>The median relative income of elderly people (65+) is worse than the EU average [2]</p> <p><i>Substantial gender gap in old-age impacts the risk of poverty or social exclusion</i></p>	The relative median poverty risk gap for older people (65+) is substantially better than the EU average [3]
4. Long-term care	<i>Access to long-term care is insufficient, especially as concerns homecare.</i>	
5. Health	<p>Life expectancy at 65 is worse than the EU average, for men [2] and, with some positive development for the total population and women [4].</p> <p>Healthy life years at 65 is worse than the EU average for men [2]</p> <p>Potential years of life lost is around the EU average with some negative development [9]</p> <p>The preventable mortality rate is worse than the EU average [2]</p>	

DENMARK

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the number of persons living in households with very low work intensity by 30,000 by 2030

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. The target is to reduce the number of persons living in households with very low work intensity by 30,000; (iv) 2022-2023 change significant for all; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Children AROPE.

	Unemployment recipients
definition	Unemployment benefits recipients, full time recipients.
unit	full time persons recipients (both passive and active recipients) (seasonally adjusted) (dagpenge)
source	y01a02, Dagpenge, Antal personer og fuldtidspersoner. Link: https://jobindsats.dk/databank/ydelser/a-dagpenge/personer-forlob-og-udgifter/antal-personer-og-fuldtidspersoner/
comment	
	Social assistance benefit
definition	Numbers of recipients of cash benefits + recipients of education and integration benefits (kontanthjælp)
unit	Both passive and active recipients
source social assistance benefit	y36a02, Kontanthjælp, Antal personer og fuldtidspersoner. Link: https://jobindsats.dk/databank/ydelser/kontanthjaelp/personer-forlob-og-udgifter/antal-personer-og-fuldtidspersoner/
source education benefit	y38a02, Uddannelseshjælp, Antal personer og fuldtidspersoner. Link: https://jobindsats.dk/databank/ydelser/uddannelseshjaelp/personer-forlob-og-udgifter/antal-personer-og-fuldtidspersoner/
source integration benefit	y35a02, Selvforsørgelses- og hjemrejseydelse samt overgangsydelse. Link: https://jobindsats.dk/databank/ydelser/selvforsorgelses-og-hjemrejseydelse-samt-overgangsydelse/personer-forlob-og-udgifter/antal-personer-og-fuldtidspersoner/
comment	The update includes a change in the numbers back in time due to the abolishment of the lowest cash benefits by January 1st 2012. As it is a headcount, all recipients of the lowest cash benefits are now listed as recipients of the same cash benefit back in time as it would otherwise mean a change in the level of recipients as from 1/1 2012 when all recipients became recipients of the same level of benefit. By January 1st 2014 a reform of the cash benefit system came into force. With this reform people under the age of 30 can no longer receive cash benefit but will receive education benefit (social assistance) at the level of the student grant. By September 1st 2015 a rule change within the cash benefit system meant that newly arrived refugees and immigrants can no longer receive cash benefit but will receive integration benefit at the level of the student grant. By July 1st 2016, the rules applied for anyone who haven't been living in Denmark for at least 7 years within the last 8 years. Therefore we have provided a table with the number of recipients of the immigration benefit, starting from September 2015.
	Disability benefit
definition	Number of pensioners (disability benefits full+partial) (førtidspension)
unit	Thousands of pensioners
source	y10a02, Førtidspension. Link: https://jobindsats.dk/databank/ydelser/tilbagetraekningsydelser/fortidspension/antal-personer-og-fuldtidspersoner/

comment	Figures do not include people who reached statutory retirement age due to comparability reasons; the data until January 2011 represent an estimation, because the calculation of the accurate share of disability pensioners only existed for one month (December).

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

DENMARK 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The rates of people aged 0-64 and people in working age population (18-64 not students) living in (quasi-)jobless households are worse than the EU average [2]</p> <p>Severe material and social deprivation rates are around the EU averages with some negative development for the total population [9] and substantially negative development for the working age population (18-64) [10]</p> <p>The S80/S20 and S80/S50 ratios are around the EU averages with some negative development [9]</p> <p>Housing cost overburden is worse than the EU average [2], substantially worse for the working age population [1], with some positive development for older people (65+) [4].¹</p>	<p>The rate of children at-risk-of poverty or social exclusion (aged 0-17) is substantially better than the EU average, as well as their risk of poverty rate [3]</p> <p>The risk of poverty rate for population living in (quasi-)jobless households is substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p>The relative median poverty risk gap is around the EU average for children (0-17) with substantially negative development [10] and for working age population (18-64) with some negative development [9].</p>	<p>The impact of social transfers (other than pensions) in reducing poverty and working age poverty (18-64) is substantially better than the EU average [3]</p> <p>The risk-of poverty rates of children and the working age population (18-64) living in households in very low work intensity are substantially better than the EU average [3]</p>
3. Pensions	<p>The median relative income of elderly people (65+) is worse than the EU average [2]</p> <p>The aggregate replacement ratio (excluding other social benefits) is worse than the EU average [2]</p>	<p>The relative median poverty risk gap (65+) is substantially better than the EU average [3]</p>

¹ The indicator measures the share of the population living in households where the total housing costs represent more than 40% of disposable income (both 'net' of housing allowances). The Methodological Guidelines and Description of EU-SILC variables (version April 2020) describes allowances (only means-tested ones included) as including rent benefits and benefits to owner-occupiers, but excluding tax benefits and capital transfers. The document defines housing costs as monthly and actually paid, connected with the household's right to live in the accommodation. They include structural insurance (for tenants: if paid), services and charges (sewage removal, refuse removal, etc.; mandatory for owners, for tenants: if paid), regular maintenance and repairs, taxes (for tenant: on the dwelling, if applicable) and the cost of utilities (water, electricity, gas and heating). For owners paying a mortgage, related interest payments are included (any tax relief deducted, but housing benefits not deducted). For tenants at market price or at reduced price, also rental payment is included. For rent free tenants, housing benefits should not be deducted from the total housing cost.

4. Long-term care		<i>Good coverage of LTC services, in particular homecare</i>
5. Health	<p>Healthy life years at birth for both men and women are substantially worse than the EU average [1]</p> <p>Life expectancy at 65 for both men and women is around the EU average with substantial negative development [10] and life expectancy at birth for both men and women is around the EU average with some negative development [9]</p>	

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the number of persons living in households with very low work intensity by 1,200,000 by 2030, and the child population at risk of poverty or social exclusion by 300,000 by decreasing children living in households with very low work intensity by 300,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2020 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. The target is to reduce the number of persons living in households with very low work intensity ((quasi-)jobless households) by 1,200,000, and the child population at risk of poverty or social exclusion by 300,000 by decreasing children living in households with very low work intensity by 300,000. * Major break in series in EU-SILC data for Germany in 2020. Due to the major break in series and to provide a baseline that is consistent with future developments, the figure from the 2020 survey shall be used as the starting point for the national poverty reduction target. (iv) 2022-2023 change not significant for AROPE, (quasi-)jobless HHs and Children AROPE; 2020-2023 change not significant for AROPE, SMSD, (quasi-)jobless HHs and Children AROPE.

Active ageing	Employment rate of older workers (55-64) in %	71.6	70.6	71.8	73.3	74.6	1.3 pp	3.0 pp	63.9	1.7 pp	5.3 pp
Pension adequacy	At risk of poverty or social exclusion for the elderly (65+) in %	18.8	21.0	20.5	19.8	20.6	0.8 pp	-0.4 pp	19.8	-0.3 pp	0.4 pp
	Median relative income of elderly people	0.84	0.82	0.85	0.84	0.84	0.0 %	2.4 %	0.89	-1.1 %	-1.1 %
	Aggregate replacement ratio	0.47	0.46	0.48	0.48	0.49	2.1 %	6.5 %	0.58	0.0 %	1.8 %
Health	Self reported unmet need for medical care	0.3	0.1	0.1	0.3	0.2	-0.1 pp	-0.1 pp	2.4	0.2 pp	0.7 pp
	Healthy life years at 65 - males	11.5	10.4	10.2	8.2	n.a.	n.a.	n.a.	n.a.	-6.3 %	-12.7 %
	Healthy life years at 65 - females	12.8	11.7	11.4	8.6	n.a.	n.a.	n.a.	n.a.	-7.1 %	-11.5 %
Poverty and social exclusion of persons with disabilities	At risk of poverty or social exclusion for persons with disabilities (% of people with disabilities above 16 years)	28.8	29.7	31.0	28.3	29.8	1.5 pp	0.1 pp	28.8	0.0 pp	-0.5 pp
Access to decent housing	Housing cost overburden rate	13.9	9.0	11.0	11.9	13.0	1.1 pp	4.0 pp	8.9	0.2 pp	-0.5 pp
Evolution in real household disposable income	Real change in gross household disposable income (in %)	1.1	0.9	0.1	0.5	-0.0	0.5 %	1.5 %	1.1	0.0 %	2.4 %

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation. Major break in EU-SILC-based series in 2020, so longer term change in EU-SILC based indicators refer to the change compared to 2020. LFS-based indicators refer still to 2019. There is also a significant break in time series for the housing cost overburden rate in Germany for 2023, so caution is needed in comparison with previous years. The reduction of "healthy life years at 65 - males" and "the reduction of healthy life years at 65 - females" in Germany is mainly attributed to methodological adjustments. Therefore, comparability to previous years is limited and changes are not shown.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

GERMANY 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The rate of people (aged 0-64) living in (quasi-)jobless households is worse than the EU average [2], and substantially worse for children [1], while it is around (above) the EU average with substantially negative development for the working age population [10]</p> <p>The severe material and social deprivation rate is around the EU average with substantial negative development for the general population and the working age population (aged 18-64) [10].</p> <p>Children living in a household suffering from severe material and social deprivation is around EU average with some negative development [9].</p> <p>Housing cost overburden is worse than the EU average for the total population [2] and for older people (65+) [2]</p> <p><i>There is a large difference in the risk of poverty and social exclusion among non-EU born people compared to native born people *</i></p>	<p>The risk-of poverty rate of children (aged 0-17) is better than the EU average with some positive development [7]</p> <p>The persistent at-risk-of-poverty rates are better than the EU average, with substantial positive development for the total population and the working age population (18-64) [8] and are substantially better than the EU average for children (0-17) [3]</p>
2. Effectiveness of social protection		<p>The impact of social transfers (excluding pensions) in reducing child poverty is substantially better than the EU average [3]</p> <p>The risk-of poverty rate of children (0-17) living in household in very low work intensity is substantially better than the EU average [3]</p>
3. Pensions	Severe material and social deprivation of older people is below the EU average, however with some negative development for total population, men and women [9]	
4. Long-term care		<i>Good access to LTC, in particular homecare</i>
5. Health	Life expectancy at 65 is worse than the EU average for women [2] and around the EU average for men with substantial negative development [10]	

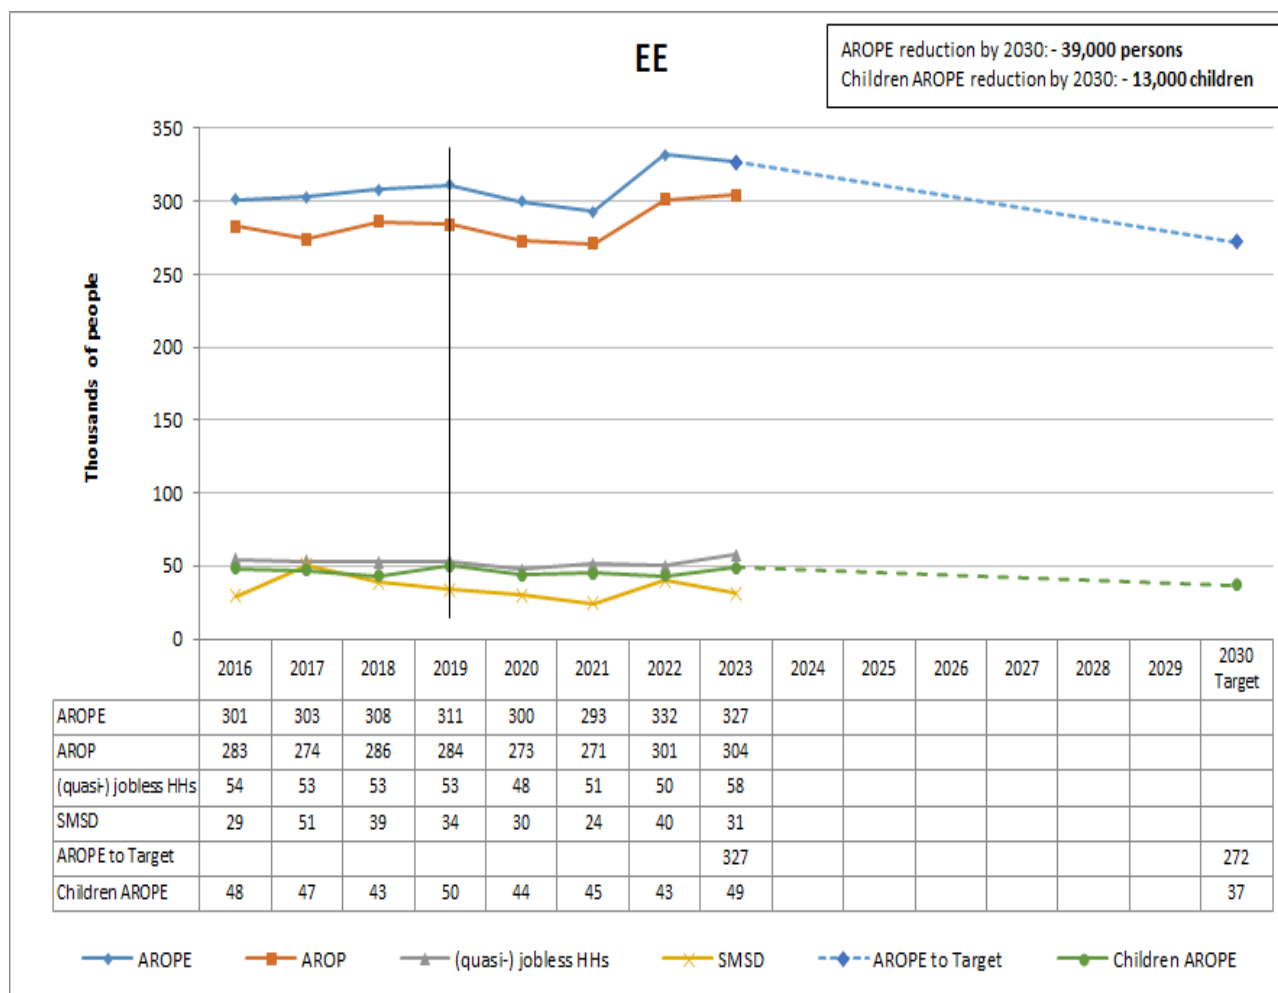

** While the SPPM VA exercise is mainly based on a few key EU-SILC and LFS indicators for non-EU born people compared with native-born people, other elements – such as the number of new non-EU born residents including asylum seekers and refugees - can also have an impact on this kind of challenges.*

ESTONIA

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 39,000 by 2030, and of children at risk of poverty or social exclusion by 13,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROP and (quasi-)jobless HHs; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Children AROPE.

eligible age group	16 years and up to retirement age
comment	<p>To find statistics about unemployment insurance benefit recipients (payments) please open the link above and select a "Unemployment insurance benefit ". A Tableau table opens, where the sheet "Väljamaksed" shows statistics about unemployment insurance benefit recipients by month.</p> <p>Definition: Unemployment insurance benefit recipients - unemployed persons who received a payment of unemployment insurance benefit during the specified period. Unemployment insurance is a type of compulsory insurance, unemployment insurance is financed from unemployment insurance premiums paid by the insured persons (employees) and the employers.</p> <p>The unemployment insurance benefit is paid to unemployed persons whose unemployment insurance period in the three preceding years is at least 12 months and whose last relationship did not end on their own initiative or mutual agreement.</p>
Note	Data has been updated 3.07.24 since 2022.
	Social assistance benefit
definition	Subsistence benefit (to maintain subsistence level) receivers
unit	Number of granted applications by households (thousands, cumulative during the year)
source	Ministry of Social Affairs
link	<p>in estonian: https://www.sm.ee/toetuste-statistika</p> <p>Some of the main statistics (no of households receiving subsistence benefit during the year, etc.) are available also at the Statistics Estonia database: https://andmed.stat.ee/en/stat/sotsiaalelu_sotsiaalne-kaitse_sotsiaalabi_toimetulekutoetused</p>
eligible age group	all age groups

comment	<p>To reach specific tables, please use first link and open from the selection "Toimetulekutoetus kohalike omavalitsusüksuste lõikes" (meaning in english "Subsistence benefit by local governments") a report with the appropriate year and quarter. For example, the report "2020. aasta I kvartal" (meaning in english "The first quarter of 2020"). An excel table opens, where on sheet "Taotlused" (meaning in English "Applications") row number 8, column C you can find the total number of granted applications. The second link is intended as additional information and refers to the Statistics Estonia annual data.</p> <p>A person living alone or a family whose monthly disposable income, after deduction of the fixed expenses connected with permanent dwelling during the current month, is below the subsistence level has right to receive a subsistence benefit. A recipient of the subsistence benefit whose family (household) members are all minors is entitled to a supplementary social benefit of 15 euros.</p> <p>The subsistence level increased (by 20%) from 63.91 to 76.7 euros for the 1st household member from the beginning of 2011 (the subsistence level of the second and each subsequent adult member of a family is 80 per cent of the subsistence level of the first member of the family). The subsistence level increased also in 2014 (by 17 % compared to the previous year) from 76,7€ to 90€ for the 1st household member. From 2015 to 2017, the subsistence level of each child of a family (household) is equal to the subsistence level of the first member of the family. The subsistence level increased (by 31%) from the beginning of 2016 to 130€ for the 1st household member. In 2018, the subsistence level for the 1st household member was 140 and the subsistence level of each child of a family is 120 per cent of the subsistence level of the first member of the family. Starting from 2019, the subsistence level was increased to 150 euros. From 1 June 2022, the subsistence level for a person living alone or the first member of a family is 200 euros per month and 160 euros for the second and each subsequent adult member of the family. The subsistence level for each minor member of the family is 240 euros per month.</p> <p>Note: In April 2010, a new social services and benefit register was introduced. Therefore the data from the 2nd quarter 2010 is not fully comparable with the previous data.</p>
	Disability benefit
definition	Recipients of benefits for disabled persons (number of 16 years old or older persons)
unit	Thousands of recipients at the end of quarter
source	Source: Social Insurance Fund
link	http://www.sotsiaalkindlustusamet.ee/et/organisatsioon-kontaktid/statistika-ja-aruandlus
eligible age group	16 years and older
comment	<p>To reach specific tables, please select from the menu on the left "Riikliku sotsiaalkindlustuse statistika ja aruanded (kord kvartalis)" (meaning in english "National social security statistics and reports (quarterly)"). From there, select a report with the appropriate year and number of months. For example, the report "Riiklik sotsiaalkindlustus 2020 3 kuud" (meaning in english "National Social Security 2020 3 months") for the first quarter of 2020. An excel table opens, where on sheet "Koond" (meaning in English "Summary") excel row number 84 shows the "Puuetega inimeste sotsiaaltoetused" (meaning in English "Social benefits for disabled"). To find the correct result, the number of beneficiaries at the end of the reporting period in column 1, rows 06 (recipients of the allowance for disabled persons of at least 16 years of age), 10 (recipients of the allowance for disabled persons of working age) and 14 (recipients of the allowance for disabled persons of retirement age) must be summed.</p> <p>Disability is the loss of or an abnormality in an anatomical, physiological or mental structure of function of a person, which in conjunction with different relational and environmental restrictions prevents participation in social life on equal bases with others. From 2008 the disabled adult allowance was replaced by disability allowance for a person of working age and disability allowance for a person of retirement age. Therefore the indicator since 2008 includes recipients of three types of benefits: recipients of the allowance for disabled persons of at least 16 years of age, for disabled persons of working age and for disabled persons of retirement age.</p>

	Incapacity for work
definition	Receivers of pension for incapacity for work
unit	Thousands of recipients at the end of quarter
source	Social Insurance Board
link	http://www.sotsiaalkindlustusamet.ee/et/organisatsioon-kontaktid/statistika-ja-aruandlus
eligible age group	16 years and up to retirement age
comment	The right for the pension for incapacity for work has a person, who is at least 16 years of age and has been declared to be permanently incapable to work, loss of whose working capacity is 40 to 100 per cent and who by the initial date of granting of the pension has acquired the following pensionable service or accumulation period in Estonia. Please see Work ability allowance – after implementing work ability reform in 2016, the incapacity of work pension is no longer granted (no new receivers).
	Work ability allowance
definition	Work ability allowance recipients
unit	thousands of recipients (monthly)
source	Estonian Unemployment Insurance Fund
link	https://www.tootukassa.ee/en/statistics-and-research/main-statistical-indicators/work-ability-allowance
eligible age group	16 years and up to retirement age
comment	To find statistics about work ability allowance recipients please open the link above and select "Work ability allowance". See the Tableau sheet "Väljamaksed", which shows statistics about work ability allowance recipients by month. Definition: Work ability allowance recipients – persons who received a payment of work ability allowance during the specified period. After the implementation of Work Ability Reform at 2016 the receivers of incapacity for work pension are gradually re-assessed and starting to receive work ability allowance instead of incapacity for work pension. Note: data has been updated since 2022.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

ESTONIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk-of poverty rate is substantially worse than the EU average [1] for the total population and around the EU average for the working age population (18-64) with substantial negative development [10]</p> <p>The risk of poverty rate for the population living in (quasi-)jobless households is worse than the EU average [2]</p> <p>The persistent at-risk-of-poverty rate is worse than the EU average [2] and it is around the EU average for children (0-17) with negative development [9]</p> <p><i>High risk of poverty and social exclusion for persons with disabilities</i></p>	Housing deprivation is better than the EU average with some positive development [7] for the general population and the working age population
2. Effectiveness of social protection	<p>The impact of social transfers (including pensions) in reducing poverty is substantially worse than the EU average for the total population [1], and worse than the EU average for the working age population (18-64) [2] and around the EU average with negative development [9] for children, while the impact of social transfers (excluding pensions) in reducing poverty, child poverty and working age poverty (18-64) is around the EU average with negative development [9]</p> <p>In work poverty, as well as the risk of poverty rate for population living in very low work intensity households (18-64) are worse than the EU average [2]</p>	
3. Pensions	<p>The risk of poverty or social exclusion of older people (aged 65+) is substantially worse than the EU average [1] for the total population, men and women.</p> <p>The risk of poverty rate of older people (aged 65+) is substantially worse than the EU average [1] The median relative income of older people (65+) is substantially worse than the EU average [1]</p> <p>The persistent at-risk-of-poverty rate of older people (aged 65+) is substantially worse than the EU average [1]</p> <p>Aggregate replacement ratio (excl other social benefits is worse than the EU average [2]</p> <p><i>There is a high gender gap in the risk of poverty or social exclusion</i></p>	
4. Long-term care	<i>Insufficient availability, affordability and quality of long-term care services</i>	

5. Health	<p>Life expectancy at birth and at 65 is worse than the EU average [2], and substantially worse than the EU average [1] for men.</p> <p>The preventable mortality rate is worse than the EU average [2].</p> <p>Potential years of life lost are worse than the EU average [2]</p> <p>Unmet needs for medical care are substantially worse than the EU average [1], in particular those due to distance and worse than the EU average when due to waiting time with some positive development [4].</p> <p>The interquintile gap in unmet needs for medical care (Q1-Q5) is around the EU average with substantially negative development [10] and it is worse than the EU average when due to the distance [2]</p>

IRELAND

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 90,000 by 2030, and of children at risk of poverty or social exclusion by 45,000

PROGRESS TOWARDS THE EUROPE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year; (iv) 2022-2023 change not significant for AROPE; 2019-2023 change not significant for AROPE, SMSD and Child AROPE.

Pension adequacy	At risk of poverty or social exclusion for the elderly (65+) in %	11.8	16.1	18.9	25.0	18.7	-6.3 pp	6.9 pp	19.8	-0.3 pp	0.4 pp
	Median relative income of elderly people	0.92	0.89	0.88	0.82	0.92	12.2 %	0.0 %	0.89	-1.1 %	-1.1 %
	Aggregate replacement ratio	0.46	0.41	0.41	0.38	0.39	2.6 %	-15.2 %	0.58	0.0 %	1.8 %
Health	Self reported unmet need for medical care	2.0	1.8	2.1	2.7	2.7	0.0 pp	0.7 pp	2.4	0.2 pp	0.7 pp
	Healthy life years at 65 - males	13.1	11.3	12.3	11.3	n.a.	-8.1 %	-13.7 %	n.a.	-6.3 %	-12.7 %
	Healthy life years at 65 - females	14.1	12.5	13.0	11.9	n.a.	-8.5 %	-15.6 %	n.a.	-7.1 %	-11.5 %
Poverty and social exclusion of persons with disabilities	At risk of poverty or social exclusion for persons with disabilities (% of people with disabilities above 16 years)	34.0	33.5	37.9	37.2	32.7	-4.5 pp	-1.3 pp	28.8	0.0 pp	-0.5 pp
Access to decent housing	Housing cost overburden rate	5.2	4.2	2.6	3.7	4.7	1.0 pp	-0.5 pp	8.9	0.2 pp	-0.5 pp
Evolution in real household disposable income	Real change in gross household disposable income (in %)	4.2	6.1	1.2	0.3	0.0	0.3 %	7.7 %	1.1	0.0 %	2.4 %

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation. For IE, there is a break in the EU-SILC based indicators in 2020 and results should therefore be interpreted with caution.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES IRELAND 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>Children (aged 0-17) living in (quasi-)jobless households is worse than the EU average and with substantially positive development [5]</p> <p><i>High poverty or social exclusion for persons with disabilities and single parents.</i></p> <p><i>The Roma and Traveller communities remain socially marginalized.</i></p>	<p>At-risk-of poverty rate (aged 18-64) is substantially better than the EU average [3]</p> <p>At-risk of poverty rate for population living in (quasi-)jobless households is substantially better than the EU average [3]</p> <p>Housing deprivation (total and for all age groups) is substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p>At-risk-of poverty rate of children living in household at work intensity between 0.55 and 1 is around the EU average and with some negative development [9]</p>	<p>Impact of social transfers (excluding pensions) in reducing poverty is substantially better than the EU average [3]</p> <p>Impact of social transfers (excluding and including pensions) in reducing child poverty and working age poverty (18-64) is substantially better than the EU average [3]</p> <p>At-risk-of poverty rate of children and of adults (18-64) living in household in very low work intensity is substantially better than the EU average [3]</p> <p>Relative median poverty risk gap (18-64 and 65+) is substantially better than the EU average [3]</p>
3. Pensions	<p>Severe material and social deprivation of older people (aged 65+) for women is around (slightly below) the EU average and with some negative development [9]</p> <p>Aggregate replacement ratio (excluding other social benefits) is substantially worse than the EU average [2]</p> <p>Persistent at-risk-of-poverty rate (aged 65+) is worse than the EU average and with substantial negative development [10]</p>	
4. Long-term care		
5. Health	<p>Life expectancy at birth and at 65 is around the EU average and with substantial negative development [10]</p>	

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 860,000 by 2030, and reduce the AROPE rate for children by 6.6 percentage points

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

(a) Total population

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, AROP, SMSD and Children AROPE; 2019-2023 change not significant for SMSD and Children AROPE.

(b) Child population

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

GREECE 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The at-risk-of poverty or social exclusion rate is worse than the EU average with some positive development, <i>particularly for non-EU born</i>, [4] and the at risk-of poverty rate is worse than the EU average for the total population and the working age population [2]</p> <p>Material and social deprivation is worse than the EU average with some positive development [4] and severe material and social deprivation rates are worse than the EU average with some positive development [4], also for the working age population (18-64) [4], and substantially positive for children [5]</p> <p>Persistent at-risk-of-poverty rate (18-64) is substantially worse than the EU average for the working age population [1]</p> <p>Housing cost overburden is substantially worse than the EU average for older people (65+) [1] and worse than the EU average for the total population, children and the working age population with some positive development [5]</p> <p><i>High energy poverty</i></p>	
2. Effectiveness of social protection	<p>Impact of social transfers (excluding pensions) in reducing poverty and child poverty (0-17) and working age poverty (18-64) is substantially worse than the EU average [1], while the impact of social transfers (including pensions) in reducing child poverty (0-17) is worse than the EU average [2]</p> <p>At-risk-of poverty rate of children living in households in very low work intensity is worse than the EU average [2]</p> <p><i>There are gaps in access to social protection and the social protection system has limited ability to reduce poverty</i></p> <p><i>While measures supporting access to services are in progress, the transition from institutional to community-based care for people with disabilities and children remains a challenge with limited access to services in particular for remote and marginalized communities.</i></p>	
3. Pensions	<p>Severe material and social deprivation of older people (aged 65+) is worse than the EU average [2] for both men and women and their material and social deprivation is substantially worse than the EU average [1]</p>	

4. Long-term care	<i>Low coverage and territorial disparities in the provision of services hinder access to long-term care</i>	
5. Health	<p>Unmet need for medical care (due to costs, waiting or distance) are substantially worse than the EU average [1], in particular those due to costs and distance.</p> <p>The interquintile gap in unmet need for medical care (Q1-Q5), due to costs, waiting or distance and the gaps due to each of these causes are all substantially worse than the EU average [1]</p>	

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 2,815,000 by 2030, and of children at risk of poverty or social exclusion by 713,000.

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, AROP and (quasi-)jobless HHs; 2019-2023 change not significant for AROPE, AROP, SMSD and Children AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat
	Unemployment benefit
definition	<p>Number of Unemployment Benefits Total (In Thousands)</p> <p>1) Contributory Unemployment Benefit</p> <p>2) Social Assistance Unemployment Benefit (including Extraordinary Unemployment Subsidy)</p> <p>3) Temporary Agricultural Subsidy</p> <p>4) Agricultural income</p> <p>5) Programme of active insertion income</p> <p>6) Employment Activation Program</p>
Updates since previous year	<p>The Spanish system of Unemployment Benefits includes contributory UB, for unemployed people who have worked for at least one year, and other types of subsidies intended to protect groups that have exhausted unemployment benefits or have not reached the minimum contributions needed to access them. They include: Unemployment Assistance* (including Extraordinary Unemployment Subsidy), Temporary Agricultural Subsidy, Agricultural Income, Active Insertion Income programme (for unemployed people in a particularly vulnerable position, like LTU, victims of domestic violence, returned emigrants, among others) and Employment Activation Program (temporary program for long-term unemployed - this is already discontinued).</p> <p>*Since July 2018, there is a new non-contributory Unemployment Benefit (the Extraordinary Unemployment Subsidy), that will substitute the Employment Activation Program, that is being phased out (no new beneficiaries since April 2018). This new subsidy is for unemployed people with low income that have exhausted other subsidies and benefits and are not entitled to receive the Employment Activation Program.</p>

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

SPAIN 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk-of poverty or social exclusion and at risk-of poverty are worse than the EU average [2] also for the working age population (18-64) and substantially worse for children (0-17) [1], while the persistent at-risk-of-poverty rate is worse than the EU average with substantially positive developments [5] for children (0-17)</p> <p>Children living in a household suffering from severe material and social deprivation is worse than the EU average [2], as well as their material and social deprivation of children and that of the working age population [2]</p> <p>The interquintile income ratios S80/S20 and S50/S20 are worse than the EU average [2]</p> <p>Housing deprivation is worse than the EU average also for the working age population (18-64), children (0-17) and older people (65+) [2]</p> <p><i>High risk of poverty and social exclusion for Roma and non-EU born people.</i></p> <p><i>Regional disparities in poverty and social exclusion are high.</i></p> <p><i>High energy poverty.</i></p>	
2. Effectiveness of social protection	<p>Impact of social transfers (both excluding and including pensions) are worse than the EU average [2] in reducing poverty of the general population working age poverty (18-64) poverty [2] and substantially worse in reducing child poverty (0-17) [1]</p> <p>Relative median poverty risk gap for children (0-17) is worse than the EU average as well as their risk-of poverty when living in household in very low work intensity [2], and their risk-of poverty when living in households with low work intensity ($0.2 < WI \leq 0.55$ and $0.55 < WI \leq 1$) is substantially worse than the EU average [1]</p> <p>The long-term unemployment rate is substantially worse than the EU average [1] and in-work poverty is worse than the EU average [2].</p> <p><i>There are remaining gaps in access to social protection, though with improvements in recent years.</i></p> <p><i>There are remaining gaps in the minimum income system (national and regional schemes)</i></p>	
3. Pensions		Aggregate replacement ratio (excl other social benefits) is substantially better than the EU average [3]

4. Long-term care		
5. Health		Life expectancy at birth and at 65 for women is better than the EU average [3] and life expectancy at 65 for the total population is better than the EU average with some positive development [7]

FRANCE

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 1,100,000 by 2030, and of children at risk of poverty or social exclusion by 300,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year; iv) *Data series adjusted for break in series in 2022 (due to the new inclusion of overseas departments and regions); v) 2022-2023 change not significant for AROP, break in series for AROPE, SMSD and child AROPE; significance of 2019-2023 changes not available.

how to find the data	File name: "Données mensuelles prestations solidarité" / Tab name: "Tableau 1" / Column name: "RSA, effectif"
source before 2017	CAF: http://data.caf.fr/dataset/foyers-allocataires-percevant-le-revenu-de-solidarite-active-rsa-niveau-national/resource/944e4f2e-dbe4-4420-969c-2ad67b533197
comment	<p>The revenu de solidarité active (RSA) scheme has been introduced in June 2009. It replaces two former social assistance benefits, the former minimum income scheme (revenu minimum d'insertion, RMI), and the lone parents benefit (allocation de parent isolé, API), and the various in-work benefits which were related to these two social assistance benefits. Notably for these reasons, the data on RMI and the data on RSA are not fully comparable. RSA was introduced in French overseas departments in 2011. Until 2016 the RSA scheme had two components (households could benefit from one or both):</p> <ul style="list-style-type: none"> - « RSA socle » is a minimum income - « RSA activité » completes the household income from work in the case of a low income. <p>Only «RSA socle» is a social assistance scheme. Within the attached data, only beneficiaries of «RSA socle» are covered.</p> <p>« RSA activité » was closed on the 1st of January 2016 and replaced by «Prime d'activité».</p>

	Youth Guarantee
definition	Persons entitled to Youth Guarantee (Garantie jeune) since 2017
unit	Thousands of persons - Seasonally adjusted - All sexes & ages
current source	DREES (based on DGEFP - I-Milo data)
link	https://data.drees.solidarites-sante.gouv.fr/explore/dataset/donnees-mensuelles-sur-les-prestations-de-solidarite/information/
how to find the data	File name: "Données mensuelles prestations solidarité" / Tab name: "Tableau 1" / Column name: "Garantie jeunes - Stocks, effectif"
source before 2017	
comment	The Youth Guarantee scheme was introduced in 2017. The scheme is targeted towards NEET youths aged 16-26, and consists in both financial and professional supports. The Youth Guarantee was stopped on the 1st of March 2022, however the remaining beneficiaries continue to participate in the program. The Youth Engagement Contract (CEJ) was created as a replacement.
	Youth Engagement Contract
definition	Persons entitled to Youth Engagement Contract (Contrat d'engagement jeune) since 2022
unit	Thousands of persons - Seasonally adjusted - All sexes & ages
current source	DREES (based on DGEFP - I-Milo data and Pole Emploi data)
link	https://data.drees.solidarites-sante.gouv.fr/explore/dataset/donnees-mensuelles-sur-les-prestations-de-solidarite/information/
how to find the data	File name: "Données mensuelles prestations solidarité" / Tab name: "Tableau 1" / Column name: "Contrat d'engagement jeune - Stocks, effectif"
source before 2017	
comment	The Youth Engagement contract was introduced on the 1st of March 2022.

	Healthy life years at 65 - males	10.4	10.2	11.3	10.2	n.a.	-9.7 %	-1.9 %	n.a.	-6.3 %	-12.7 %
	Healthy life years at 65 - females	11.6	11.8	12.6	11.7	n.a.	-7.1 %	0.9 %	n.a.	-7.1 %	-11.5 %
Poverty and social exclusion of persons with disabilities	At risk of poverty or social exclusion for persons with disabilities (% of people with disabilities above 16 years)	25.0	26.0	28.1	27.9	27.0	-0.9 pp	n.a.	28.8	0.0 pp	-0.5 pp
Access to decent housing	Housing cost overburden rate	5.5	5.6	n.a.	6.5	6.5	0.0 pp	n.a.	8.9	0.2 pp	-0.5 pp
Evolution in real household disposable income	Real change in gross household disposable income (in %)	2.5	0.3	2.8	0.3	0.0	0.3 %	3.5 %	1.1	0.0 %	2.4 %

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation. Large break in 2023 in social and material deprivation and in all linked indicators (including AROPE) so latest year changes for these not shown, and major break in EU-SILC data series in 2022, due to the new inclusion of overseas departments and regions which has a significant negative effect on many social indicators, so comparison to 2019 not shown for the SILC-based indicators. *Figures displayed (in %) for AROPE, AROP, AROP threshold, SMSD and (quasi-)jobless HHS are not adjusted for the break in series in 2022 unlike figures (in thousands) on page 68.*

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES FRANCE 2024*

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The rate of children (aged 0-17) living in (quasi-)jobless households is worse than the EU average [2], as well as their persistent risk of poverty [2]</p> <p>Housing deprivation rates are worse than the EU average for the general population and working age population (18-64) [2] and substantially worse than the EU average for children (0-17) [1]</p> <p><i>There is a high risk of poverty and social exclusion among non-EU born people.</i></p> <p><i>Regional disparities in poverty and social exclusion are high, in particular between outermost regions and mainland France</i></p>	
2. Effectiveness of social protection	<i>Children from a disadvantaged socioeconomic background face a high risk of inequality of opportunities</i>	
3. Pensions		
4. Long-term care		
5. Health	Unmet need for medical care due to distance is worse than the EU average [2]	

* For France, major breaks in series in EU-SILC data in 2022, due to the new inclusion of overseas departments and regions, which has a significant negative effect on many social indicators. As time comparisons (2020 vs 2023) may not be appropriate, the exercise focused on levels only (flag good social outcomes for situations “++” and key social challenges for situations “-“ and “- -“).

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 298,000 by 2030, and of children at risk of poverty or social exclusion by 40,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMDS - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMDS), the reference is the current year; (iv) Major break in series in EU-SILC data in 2023 for income-related indicators (and also AROPE); 2019-2023 change not significant for SMDS, break in series for AROPE, AROP and child AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

Unemployment	
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat
Unemployment benefit	
definition	Unemployed persons on the CES register are entitled to unemployment benefit in the reporting month based on the stipulations of the Labor Market Act, Official Gazette No. 118/2018, 32/20, 18/22,156/23. An unemployed person in terms of this Act is a person capable or partially able to work, aged 15 to 65.
unit	Number of persons of unemployment benefit beneficiaries, in thousands
source	Croatian Employment Service
link	www.hzz.hr
comment	
Social assistance benefit/means-tested minimum income	
definition	<p>On the basis of the Social Welfare Act that entered into force on 17 February 2022 ("The Official Gazette" No. 18/22, 46/22, 119/22, 71/23, 156/23) the right to a guaranteed minimum benefit is granted to a single person or a household that does not have sufficient funds to meet basic living needs, under the conditions prescribed by this Act.</p> <p>The right to a guaranteed minimum benefit is depending on the family structure and it is means-tested (income and property).</p> <p>The conditions for recognizing the right to a guaranteed minimum benefit are determined on the basis of the realized income of the applicant and all members of the joint household and on the basis of property owned by the applicant and all members of the joint household.</p> <p>All age groups are entitled to GMB.</p>
unit	Number of persons of social assistance beneficiaries, in thousands
source	Ministry of Labour, Pension System, Family and Social Policy of the Republic of Croatia
link	https://mrosp.gov.hr/
comment	In the column for the 2014, the number of maintenance assistance and GMB beneficiaries' was shown, since the all maintenance assistance beneficiaries have not been yet translated into GMB.
Disability benefit	
definition	<p>Disability pension is a pension granted on the grounds of person's total or occupational disability if disability occurred prior to the age of 65.</p> <p>All age groups (youth, prime working age, older workers) are entitled to disability pension, if they fulfil prescribed legal conditions.</p>
unit	Number of disability pension beneficiaries, in thousands
source	Croatian Pension Insurance Institute
link	http://www.mirovinsko.hr/
comment	<p>Number of disability pension beneficiaries from October 2013 does not include beneficiaries whose benefit payment have been suspended because they have not submitted their Personal Identification Number.</p> <p>From February 2015 disability pensioners are translated into old age pensioners after reaching the statutory retirement age and these pensioners are included in the total number of disability pension beneficiaries.</p>

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation. Major break in series in EU-SILC data in 2023 for income-related indicators (and also AROPE), so changes not shown for these indicators

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

CROATIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk-of poverty rate is worse than the EU average [2]</p> <p>The relative median poverty risk gap is worse than the EU average [2]</p> <p>The persistent at-risk-of-poverty rates for the total population and the working age population are substantially worse than the EU average [1] and worse than the EU average for children (0-17) [2]</p> <p><i>High risk of poverty and social exclusion for persons with disabilities</i></p> <p><i>Regional disparities in poverty and social exclusion are high</i></p>	<p>Severe material and social deprivation rates are better than the EU average with some positive development for the total population and the working age population [7]</p> <p>The rates of people living in (quasi-)jobless households (aged 0-64 and aged 18-64) are better than the EU average with some positive development [7] and substantially better for children (0-17) [3].</p> <p>Material and social deprivation rates are substantially better than the EU average for children (0-17) [3] and better with substantially positive development for the total population and working age population (18-64) [8]</p> <p>Housing deprivation rates are substantially better than the EU average for the total population, the working age population (18-64) and for children (0-17) [3]</p>
2. Effectiveness of social protection	<p>Impact of social transfers (excluding pensions) in reducing poverty and working age poverty (18-64) is worse than the EU average [2] and impact of social transfers (including pensions) in reducing poverty is substantially worse than the EU average [1]</p> <p>The risk of poverty rate for the population living in very low work intensity households (18-64) is substantially worse than the EU average [1]</p> <p><i>Low adequacy and coverage of minimum income</i></p>	
3. Pensions	<p>The risk of poverty or social exclusion of older people (aged 65+, total, men and women) is substantially worse than the EU average [1], as well as their risk of poverty and persistent risk of poverty [1].</p> <p>The relative median poverty risk gap of older people (65+) is substantially worse than the EU average [1],</p> <p>The aggregate replacement ratio and the median relative income of elderly people (65+, excluding other social benefits) are substantially worse than the EU average [1]</p>	
4. Long-term care	<i>Insufficient access to de-institutionalised long-term care services, in particular organised homecare.</i>	

5. Health	<p>Life expectancy at 65 for the total population and women is substantially worse than the EU average [1] and worse than the EU average for men [2] and life expectancy at birth for total population, men and women is worse than the EU average [2]</p> <p>Healthy life years at 65 for women is worse than the EU average with some positive development [4]</p> <p>Unmet need for medical care due to distance is worse than the EU average with some positive development [4]</p> <p>The treatable mortality standardized rate and preventable mortality rate are worse than the EU average [2]</p>	
-----------	---	--

* For Croatia, major breaks in series in EU-SILC data in 2023 have a significant effect on indicators related to income. For those indicators, time comparisons (2020 vs 2023) may not be appropriate and the exercise focused on levels only (flag good social outcomes for situations “++” and key social challenges for situations “-“ and “- -“)

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the population at risk of poverty or social exclusion (AROPE) by 3,200,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year; (iv) 2022-2023 change not significant for SMSD; 2019-2023 change not significant for AROPE, SMSD, (quasi-)jobless HHs and Child AROPE.

comment	The Birth Allowance (so called Bonus bebè) was introduced by Law 190/2014 for births or adoptions in the three-year period 2015-2017. The benefit was confirmed by other laws for the subsequent years, ceased as of 1° January 2022 and has not been refinanced. The measure was replaced with the Single Universal Allowance (AUU).
	Assegno unico universale (AUU) - Single Universal Allowance
definition	Allowance to support households with children under specified income conditions
unit	thousands of households - annual data
source	Source: Inps
link	Portale Inps - Dati Cartacei - AUU
comment	Introduced as of 1° March 2022 by Legislative Decree 230/2021. AUU beneficiaries are households with dependent minor children or those who have not yet reached the age of 21, if students or unemployed, as well as disabled children without age limits. This benefit absorbs deductions for dependent children up to the age of 21 and replaces several previous measures for households.

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

ITALY 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk-of poverty rate (total and for children aged 0-17) is worse than the EU average [2] and it is worse than the EU average with some positive development for the working age population (aged 18-64) [4]</p> <p>Persistent at-risk-of-poverty rate is worse than EU average [2] for the total population and substantially worse than EU average [1] for children (aged 0-17) and the working age population (aged 18-64)</p> <p><i>There is a high risk of poverty or social exclusion among non-EU born people.</i></p> <p><i>Regional disparities in poverty and social exclusion are high</i></p>	
2. Effectiveness of social protection	<p>At-risk-of poverty rate of children living in household at work (work intensity between 0.2 and 0.55) is worse than EU average [2]</p> <p>Rate of long-term unemployment is substantially worse than EU average [1]</p> <p><i>There is a high risk of in-work poverty particularly for non-standard workers and there are gaps in access to social protection particularly for the self-employed, despite recent improvements.</i></p>	
3. Pensions	Relative median poverty risk gap (65+) is worse than EU average [2]	
4. Long-term care		
5. Health	The rate of child mortality for children aged 1 -14 is worse than EU average [2]	Life expectancy at 65 (total and men) is better than the EU average and with some positive development [7]

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROE) by 10,000 by 2030, and of children at risk of poverty or social exclusion by 3,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, AROP, SMSD and (quasi-)jobless HHs; 2019-2023 change not significant for AROPE, AROP, SMSD and Child AROPE.

Source: Eurostat (ESSPROS).

Notes.: 1) The table presents the social protection benefits. 2) For the case of Cyprus, as regards the function "Housing", the benefits are all means tested (i.e. 'Housing' under Non-means tested is 'not applicable' for Cyprus).

TRENDS IN TAKE-UP OF SELECTED BENEFITS

CY	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat
	Unemployment benefit
definition	Number of beneficiaries for unemployment benefit
unit	Thousands of applicants
source	Social Insurance Services, Ministry of Labour and Social Insurance, Cyprus
comment	CY UB beneficiaries refer to the number of beneficiaries for unemployment benefit from Social Insurance Services at the corresponding period. The unsmoothness of the number of beneficiaries is due to the seasonality effect of the hospitality industry.
	Social assistance benefit / Guaranteed Minimum Income
definition	Number of public assistance beneficiaries & guaranteed minimum income beneficiaries
unit	Thousands of beneficiaries. The number corresponds to the total number of persons living in the household of a recipient person
source	1. Welfare Benefits Administration Service, Deputy Ministry of Social Welfare, Cyprus 2. Social Welfare Services, Deputy Ministry of Social Welfare, Cyprus
comment	<p>CY public assistance beneficiaries & Guaranteed Minimum Income Beneficiaries refer to the number of applicants plus their dependants. The data in the table from 10/2014 and onwards includes figures for public assistance beneficiaries and guaranteed minimum income beneficiaries.</p> <p>The Guaranteed Minimum Income (GMI) was established in July 2014 with the aim to ensure a socially acceptable minimum standard of living for persons (and families) legally residing in the Republic of Cyprus whose income and other economic resources are insufficient to meet their basic and special needs. The new GMI will gradually replace the existing public assistance. The nature of the benefit is differential in that it varies, amongst others, according to the applicant's income and family structure.</p>

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

CYPRUS 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>Housing deprivation rates are worse than the EU average with some positive development for children (0-17) and working age population (18-64) [4] and substantial positive development for total population and older people (65+) [5]</p> <p><i>High energy poverty</i></p> <p><i>Persons with disabilities experience higher risk of poverty or social exclusion and substantial employment gaps.</i></p>	<p>The at-risk-of poverty or social exclusion rates for children (aged 0-17) and for the working age population (18-64) [3] are better than the EU average with substantially positive development for children [8].</p> <p>At-risk-of poverty rate of children (aged 0-17) is better than the EU average with positive development [7]</p> <p>The rates of people (aged 0-64) living in (quasi-)jobless households are substantially better than the EU average for the total population, children (aged 0-17) and for the working age population (18-64) [3].</p> <p>The relative median poverty risk gap is substantially better than the EU average [3]</p> <p>The housing cost overburden (65+) is substantially better than the EU average [3]</p>
2. Effectiveness of social protection	Impact of social transfers (other than pensions) in reducing poverty is worse (below) the EU average with some negative development [9] also for the working age population	The relative median poverty risk gap for the total and working age population (18-64) is substantially better than the EU average [3]
3. Pensions	<p>The risk of poverty or social exclusion of old age men (aged 65+) is worse than the EU average [2] as well as their risk of poverty [2] and the risk of poverty of the total population 65+ [2]</p> <p>The aggregate replacement ratio (excluding other social benefits) is worse than the EU average [2]</p> <p>Median relative income of elderly people (65+) is worse than the EU average [2]</p>	
4. Long-term care	<i>Low public funding of long-term care leads to accessibility issues</i>	

5. Health	Life expectancy at birth and at 65 is around (slightly above for at birth, and for at 65 for total and males, slightly below for at 65 for women) the EU average, with substantially negative development for men [10] and negative development for women and total population [9].	Healthy life years at birth for both men and women are better than the EU average with substantially positive development [8]

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the population at risk of poverty or social exclusion (AROPE) by 95,000 by 2030

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year; (iv) 2022-2023 change not significant for AROPE, AROP, (quasi-)jobless HHs and Child AROPE; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

LATVIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The at-risk-of poverty or social exclusion rate for the total population is worse than the EU average [2]</p> <p>At-risk-of poverty rate is substantially worse than the EU average [1] for the total population and worse than the EU average [2] for adults aged 18-64, both deteriorating.</p> <p>Relative median poverty risk gap is worse than the EU average [2]</p> <p>The income interquintile ratios S80/S20 and S80/S50 are substantially worse than the EU average [1]. The interquintile share ratio S50/S20 is worse than the EU average [2]</p> <p>Housing deprivation for the total population, adults (aged 18-64) and older people (aged 65+) is worse than the EU average [2]</p> <p><i>The risk of poverty and social exclusion for persons with disabilities is high*</i></p>	Persistent at-risk-of-poverty rate (0-17) is substantially better than the EU average [3]
2. Effectiveness of social protection	<p>The impact of social transfers in reducing poverty and child poverty is worse than the EU average (excluding pensions) [2] and substantially worse than the EU average [1] (including pensions).</p> <p>At-risk of poverty rate for population living in very low work intensity households (18-64) is substantially worse than the EU average [1]</p> <p><i>The level of the minimum income adequacy and the benefit coverage are below the EU average</i></p>	
3. Pensions	<p><i>High gender gap in old-age poverty and social exclusion</i></p> <p>People at risk of poverty or social exclusion (aged 65+) and at-risk-of poverty rate of older people (aged 65+) are substantially worse than the EU average [1] for the total population and women, and worse than the EU average and with some positive development [4] for men</p> <p>Relative median poverty risk gap (65+) is worse than the EU average [2]</p> <p>Median relative income of elderly people (65+) is substantially worse than the EU average [1]</p>	
4. Long-term care	<i>Insufficient availability of long-term care services, in particular homecare</i>	

<p>5. Health Gap unmet need med care Q1-Q5</p>	<p>Life expectancy at birth and at 65 is substantially worse than the EU average and is deteriorating [1]</p> <p>Healthy life years at 65 is substantially worse than the EU average [1]</p> <p>Potential years of life lost is substantially worse than the EU average and is deteriorating [1]</p> <p>Unmet need for medical care for the total population, and due to waiting and distance in particular is substantially worse than the EU average and is deteriorating [1], and for costs is worse than the EU average [2]</p> <p>The interquintile gap in unmet need for medical care in Q1-Q5 is substantially worse than the EU average and is deteriorating [1], including when due to distance.</p>	<p>The interquintile gap in unmet need for medical care due to waiting time (Q1 - Q5) is substantially better than the EU average [3]</p>
--	---	---

** The disability employment gap indicator is currently computed from the EU-SILC and based on the disability status as given by the Global Activity Limitation Index (GALI). Survey respondents answer the following questions: 1) 'Are you limited because of a health problem in activities people usually do? Would you say you are ... severely limited; limited, but not severely; or not limited at all?' If answer to question 1) is 'severely limited' or 'limited but not severely', respondents answer the question 2) 'Have you been limited for at least for the past 6 months? Yes or No?'. A person is considered disabled if the answer is 'Yes' to the second question.*

LITHUANIA

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the population at risk of poverty or social exclusion (AROPE) by 223,000 by 2030

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year; iv) 2022-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE; 2019-2023 change not significant for AROPE, AROP, and (quasi-)jobless HHs.

comment	The new version of the Law on Unemployment Social Insurance came into force on 1 July 2017. A person having a record of Unemployment Insurance of at least 12 months over the past 30 months before his registration with the territorial labour exchange shall be entitled to the benefit. The duration of payment of Unemployment Insurance Benefit was extended to 9 months and is no longer depended on the length of the insurance record. Formula for calculating an Unemployment Insurance Benefit has also changed, thus this benefit increased. Working-age population is eligible for this benefit if they have required work history. Generally, benefit is paid for 9 months, but if a person is pre-retirement age (less than 5 years from the retirement) - this can be extended to up to 11 months.
	Social assistance benefit
definition	Number of recipients of social benefit
unit	Thousands of recipients persons
source	The Social Assistance Information System
link	http://vitrinos.spis.lt:8080/
comment	The Social Benefit is means-tested and granted upon evaluation both of the income received and the value of the property possessed. Families and single residents are entitled to Social Benefit if either single resident or one spouse works or does not work, because they are full-time students or pensioners, or individuals above retirement age, or disabled, or nursing a disabled or sick family member, or registered at the local office as unemployed, or taking care of a child under the age of 3 years or under the age of 8 years, etc. The information is only available in Lithuanian. The short description on extracting data of social assistance recipients: 1) open link; 2) select from the top row second icon ("statistinės"); 3) "Laikotarpis" lets to choose year, the icons to the right shows shortcut of the months (January is "saus", February "vas", etc. Months goes from the left to the right). Choose particular month (but if you want information for several months: select multiple months); 4) Then select icon "Teritorija". This icon shows all the municipalities in Lithuania. By default, only Vilnius mun. is selected. You have to transfer all the municipalities from the left column to the right; 5) Select next icon "Paramos tipai". This icon shows all the benefits and services that municipalities provide. From the left column select "Socialinė atskirtis". This is the social exclusion benefits. After selecting "Socialinė atskirtis", from the right column select "Socialinė pašalpa" (social assistance) (it should be at the top); 6) Then select "Rodikliai ir Detalizacija" icon. This icon allows to select what kind of information about social assistance benefit do you want to get. For the data that is written in data sheet, select "Rodikliai ir detalizacija" icon and then "Vidutinis gavėjų skaičius per mėnesį" (average recipients number per month) and unselect "Išmokų/paslaugų skaičius" (number of benefits/services) and "Paramos/Paslaugų suma" (sum of assistance/services); 7) Click on "Generuoti" icon. What is more, you can choose how to you want to see data (the icon next to months icon allows to do it. By default, data is showed as HTML). This system shows exact number of social assistance, which municipalities updated. Social assistance benefit can get anyone irrespective of their age. Eligibility rules are: income and assets test.
	Disability benefit
definition	Number of working age disability pension (lost working capacity and invalidity) recipients
unit	Thousands of pensioners

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES
LITHUANIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>At-risk-of poverty rate is worse than the EU average [2] and substantially worse than the EU average when living in (quasi-)jobless households [1]</p> <p>The income interquintile ratios S80/S20 and S80/S50 are substantially worse than the EU average [1]</p> <p>Housing deprivation (65+) is worse than EU average [2]</p> <p><i>The risk-of poverty or social exclusion for persons with disabilities is high</i></p> <p><i>High energy poverty</i></p>	Housing deprivation of children (0-17) is better than the EU average and with some positive development [7]
2. Effectiveness of social protection	<p><i>There are gaps in access to social protection, especially in terms of adequacy</i></p> <p>Impact of social transfers (including pensions) in reducing poverty and working age poverty (18-64) is substantially worse than the EU average [1]</p> <p>At-risk-of poverty rate when living in household in very low work intensity is worse than EU average for children (aged 0-17) [2] and substantially worse than the EU average for adults (aged 18-64) [1]</p> <p>Relative median poverty risk gap for adults (aged 18-64) is worse than EU average [2]</p>	
3. Pensions	<p>The risk of poverty or social exclusion rates of older people (aged 65+) and their risk-of poverty rates are substantially worse than the EU average [1] for the total population and women and worse than EU average [2] for men.</p> <p>Aggregate replacement ratio (excluding other social benefits) is substantially worse than the EU average [1]</p> <p>Median relative income of elderly people (65+) is substantially worse than the EU average [1]</p> <p><i>High gender gap in old-age poverty.</i></p>	
4. Long-term care		

<p>5. Health</p>	<p>Life expectancy at 65 for women is worse than EU average [2]</p> <p>Potential years of life lost is substantially worse than the EU average [1]</p> <p>Treatable mortality standardized rate is substantially worse than the EU average [1]</p> <p>Preventable mortality is substantially worse than the EU average [1]</p> <p>Unmet need med care – waiting is worse than EU average [2]</p>	
------------------	--	--

LUXEMBOURG

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 4,000 by 2030, and of children at risk of poverty or social exclusion by 1,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year; (iv) 2022-2023 change not significant for SMSD; 2019-2023 change not significant for AROPE, SMSD and Child AROPE.

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES LUXEMBOURG 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk-of poverty rates for the total population, children aged 0-17 and adults aged 18-64 are worse than the EU average [2]</p> <p>Persistent at-risk-of-poverty rate (0-17) is worse than the EU average [2]</p> <p>Housing cost overburden (total population, children aged 0-17 and adults aged 18-64) is substantially worse than the EU average [1]</p> <p><i>Non-EU born face poorer social outcomes and higher in-work poverty than native born people.</i></p>	<p>The rate of people (aged 0-64), children (aged 0-17) and adults (aged 18-64) not students living in (quasi-)jobless households is substantially better than the EU average [3]</p> <p>At-risk of poverty rate for population living in (quasi-)jobless households is better than the EU average and with some positive development [7]</p>
2. Effectiveness of social protection	<p>Impact of social transfers (both excluding and including pensions) in reducing child poverty and working age poverty, and for the total population in reducing poverty (including pensions) is worse than the EU average [2]. The total impact of social transfers (excluding pensions) in reducing poverty is around the EU average and with substantial negative development [10]</p> <p>At-risk-of poverty rate of children living in household at work (work intensity between 0.55 and 1) is substantially worse than the EU average [1]</p> <p>In-work poverty (18-64) is substantially worse than the EU average [1]</p>	<p>Relative median poverty risk gap (18-64) is substantially better than the EU average [3]</p>
3. Pensions		<p>Aggregate replacement ratio (excluding other social benefits) is substantially better than the EU average [3]</p> <p>Persistent at-risk-of-poverty rate of older people (aged 65+) is better than the EU average and with some positive development [7]</p>
4. Long-term care		
5. Health	<p>Healthy life years at birth for women is worse than the EU average [2]</p> <p>The interquintile gap in unmet need for medical care due to waiting time (Q1 – Q5) is worse than the EU average [2]</p>	

HUNGARY

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the material and social deprivation rate of families with children to 13% by 2030, and thereby reduce the population in AROPE by 292,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

(a) Main HU poverty target – reduction of material and social deprivation for families with children

(b) Associated planned reduction in AROPE population

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. The target is to reduce the population in AROPE by 292,000, by decreasing the material and social deprivation rate of families with children to 13%; (iv) 2022-2023 changes all significant; 2019-2023 change not significant for AROPE, AROP, SMSD and (quasi-)jobless HHs and child AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

HU	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat
link	https://appsso.eurostat.ec.europa.eu/nui/submitViewTableAction.do
comment	Eurostat table name: Unemployment by sex and age – monthly data (une_rt_m)
	Unemployment benefit
definition	Unemployment Benefit recipients - Recipients of jobseekers' allowance and jobseekers' assistance
unit	Thousands of recipients
source	Ministry for National Economy
link	https://nfsz.munka.hu/tart/munkaeropiac
comment	<p>At the end of 2010 data from 2008 till 2010 about jobseekers' allowance were modified because of the changes in the functioning of the IT system, which revised the number of recipients of unemployment benefit.</p> <p>On the other hand data of 2006, 2007 were also modified because we have found significant differences between this number of HU jobseekers allowance, assistance receivers and number of recipients of jobseekers allowance, assistance (were registered by PES).</p>
	Social assistance benefit
definition	Recipients of benefit for people in active age (Former name of the benefit was regular social assistance)
unit	Thousands of individual recipients
source	Hungarian Treasury
definition	Benefit for people in active age is an income supplement provision in the form of cash, provided by county offices. Its aim to guarantee a minimal standard of living for those who have no income.
	Only one person in a family can be eligible to the benefit for persons in active age, except for the case when two claimants are entitled to different cash benefits (one person is entitled to employment substituting benefit, the other to regular social assistance).
	Disability benefit
definition	Disability subsidy recipients
unit	Thousands of recipients
source	Central Administration of National Pension Insurance https://www.onyf.hu/en/
definition	Financial support for severely disabled persons over the age of 18, who are unable to care for themselves or need permanent assistance from others.

Source: Eurostat (EU-SILC, LFS, Mortality data)

Note : Caution is needed with the indicator "Relative median at-risk-of-poverty gap (0-17)" as the time series is very volatile, which hints at underlying basic methodological issues (e.g. sampling issues). The same caveat also applies to the "Impact of social transfers (excl. pensions) in reducing child poverty", while the improvement in childcare 0-3 might also be due to a sampling issue.

Poverty and social exclusion of persons with disabilities	At risk of poverty or social exclusion for persons with disabilities (% of people with disabilities above 16 years)	29.2	30.2	31.4	30.0	32.4	2.4 pp	3.2 pp	28.8	0.0 pp	-0.5 pp
Access to decent housing	Housing cost overburden rate	4.2	4.9	2.4	8.1	8.7	0.6 pp	4.5 pp	8.9	0.2 pp	-0.5 pp
Evolution in real household disposable income	Real change in gross household disposable income (in %)	4.8	-0.5	6.6	4.2	0.0	4.2 %	10.5 %	1.1	0.0 %	2.4 %

Note: For the poverty threshold values, levels are shown in PPS but changes are shown as changes in national currency terms and accounting for inflation. Caution is needed with the indicator “Relative median at-risk-of-poverty gap (0-17)” as the time series is very volatile which hints at underlying basic methodological issues (e.g. sampling issues).

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

HUNGARY 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>Severe material and social deprivation rate are worse than the EU average for the total population and children [2]</p> <p>Relative median poverty risk gap is worse than the EU average [2]</p> <p>Material and social deprivation rates are worse than the EU average and with some positive development [4] for children (0-17) and worse than the EU average [2] for older people (65+)</p> <p><i>Significantly higher and increasing risk of poverty and social exclusion for Roma people and lower educated people, and higher for persons with disabilities*, than for general population</i></p> <p><i>Regional disparities in poverty and social exclusion are high</i></p>	<p>People (aged 0-64) and adults (18-64) not students living in (quasi-)jobless households are substantially better than the EU average [3]</p> <p>Persistent at-risk-of-poverty rates of the total population and of adults (18-64) are substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p>Impact of social transfers (excluding and including pensions) in reducing poverty, child poverty and working age population poverty is worse than the EU average with substantially negative development [10]</p> <p>Relative median poverty risk gap is substantially worse than the EU average [1] for children (0-17) and is worse than the EU average [2] for the working age population (18-64)</p> <p><i>Children from a disadvantaged socioeconomic background face a high risk of inequality of opportunities</i></p> <p><i>The adequacy of social assistance is low and deteriorating, and the duration of the unemployment benefits is the shortest in the EU</i></p>	<p>At-risk of poverty rate for population living in very low work intensity households (18-64) is better than the EU average and with substantially positive development [8]</p>
3. Pensions	<p>Severe material and social deprivation of older people (aged 65+) for men is worse than the EU average [2]</p> <p>Median relative income of older people (65+) is worse than the EU average [2]</p>	
4. Long-term care	<p><i>Access to long-term care, in particular homecare, is insufficient</i></p>	

<p>5. Health</p>	<p>Life expectancy at birth and at 65 is substantially worse than the EU average [1]</p> <p>Healthy life years at 65 for men is worse than the EU average and with some positive development [4]</p> <p>Potential years of life lost is substantially worse than the EU average [1]</p> <p>Treatable mortality standardized rate and preventable mortality rate are substantially worse than the EU average [1]</p>

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the at-risk-of-poverty-or-social-exclusion (AROPE) rate by 3.1 percentage points by 2030, and the child AROPE rate by 6 percentage points

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation (SMSD), the reference is the current year. The target is to reduce the overall AROPE rate by 3.1 percentage points. Malta's national target for Child AROPE is equivalent to 1% of the total -3.1% AROPE target. This will result in an approximate 6 percentage points reduction in the child AROPE rate by 2030, compared to the 2019 baseline year. (iv) 2022-2023 change not significant for AROPE, AROP and (quasi-)jobless HHs; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE.

comment	
	Unemployment benefit
definition	1) Unemployment Benefit - UB; 2) Special Unemployment Benefit - SUB; 3) Unemployment Assistance - UA
unit	Hundreds of recipients
source	Ministry for Social Policy and Children's Rights
link	https://socialsecurity.gov.mt/en/information-and-applications-for-benefits-and-services/work-incentives-and-unemployment-benefits/
comment	1) Unemployment Benefit may be awarded to a person who has paid Class 1 or Class 2 Social Security Contributions and is registering with Jobsplus under Part I of the Unemployment Register. 2) Special Unemployment Benefit may be awarded to a person who has paid Class 1 or Class 2 Social Security Contributions; qualifies for the Unemployment Assistance and is the Head of Household and satisfies the means and capital tests for UA.; 3) Unemployment Assistance may be awarded to a head of household who is registering under Part 1 of the Unemployment Register and satisfies the means and capital test.
	Social assistance benefit
definition	1) Social Assistance - SA; 2) Carers Allowance - CRA; 3) Supplementary Allowance - SPA (only low income earners are being considered as related to the crisis); 4) Social Assistance for Drug Addicts - DAD
unit	Thousands of beneficiaries
source	Ministry for Social Policy and Children's Rights
link	https://socialsecurity.gov.mt/en/information-and-applications-for-benefits-and-services/non-contributory-benefits/
comment	<p>1) A Social Assistance may be awarded to a Head of Household who may:</p> <ul style="list-style-type: none"> • not be capable of working due to medical reasons; or • cannot engage in employment due to having care and custody of children, and is legally or defacto separated; or • be married, in a civil union; cohabiting in accordance with the pertinent Laws of Malta, or caring for the spouse who may be critically ill. In this case the application is subject to approval by a Medical Board, appointed in accordance with the Social Security Act (Cap. 318 of the Laws of Malta). <p>2) To be entitled for this benefit, the carer should be living in the same household as the patient and cannot participate in any economic activity due to the caring for a medium dependent patient on a full-time basis. Eligibility is determined by a multi-disciplinary board by practicing the Barthel Index and/or Mini Mental State Examination scores;</p> <p>3) Supplementary Allowance is payable to households where the total income of the members falls below the limits outlined by the Social Security Act from time to time. In this regard, not all Supplementary Allowance beneficiaries are related to the economic crisis but only beneficiaries on low household income. SPA is paid every 13 weeks (roughly every 3 months), being Dec/Jan, Mar/Apr, Jun/Jul, and Sep/Oct;</p> <p>4) The Drug Addict Assistance may be awarded to a person who is following a drug or alcohol rehabilitation therapeutic program on a voluntary basis.</p>

	<p>(5) The Increased Carer's Allowance may be awarded to a single, married, in civil union, or cohabiting person who is over eighteen (18) years of age and is taking care of a relative, with high dependency, living within the same household on a full-time basis. The Increased Carer's Allowance is paid every four (4) weeks in advance.</p> <p>If the applicant for an Increased Carer's Allowance was in employment before applying for the allowance, s/he may be entitled for Social Security Contributions credits.</p> <p>Further to Social Security Contributions credits, a beneficiary in receipt of the Increased Carer's Allowance, may also be entitled to pay back-dated Social Security Contributions which are missing from their respective contribution record. The scope of this scheme is to enable applicants either qualify for a contributory pension, or else enhance their current or potential pension payment rate.</p> <p>An official document from the institution concerned is received by the Department of Social Security confirming date when the drug or alcohol therapeutic programme was initiated.</p>
	Disability benefit
definition	1) Severe Disability Assistance - SDA (including Assistance for the Visually Impaired - BLD); 2) Disability Assistance – DA3) Disablement Pension (termed as Injury Pension in Social Security Act CAP 318)- DP; 4) Invalidity Pension – IP; 5) Increased Severe Disability Pension - ISDA
source	Ministry for Social Policy and Children's Rights
link	https://socialsecurity.gov.mt/en/Benefits-and%20Assistance/Pages/Benefits-Information.aspx
comment	<p>1) Payable to citizens of Malta over 16 years of age. Various types of disabilities are listed under the Social Security Act and payable as from the age of 16 except from the Assistance for the Visually Impaired which is awarded as from the age of 14; This Benefit is not means tested and persons on SDA may engage in a gainful occupation.);.</p> <p>2) Disability Assistance is awarded to persons suffering from a permanent total paralysis or permanent total severe malfunction or permanent total disease, whether through amputation or otherwise of one of the upper or lower limbs; or are totally and permanently mute or permanently deaf to a degree of no less than seventy (70) decibels. This benefit is not means tested and persons may engage in a gainful occupation.</p> <p>3) Payable if injury or disease caused or contracted whilst at work is considered to cause a loss of physical or mental faculty calculated between the range of 20% and 89%. Rates awarded according to the degree of disablement. Where the degree of disablement is assessed at 90% and over, the person concerned is automatically awarded an Invalidity Pension at the full rate.</p> <p>4) The Invalidity Pension may be awarded to a person who is certified as being incapable for suitable fulltime or part-time employment or self-employment due to a serious disease or physical or mental impairment, subject to the relative social security contribution conditions under the Social Security Act (Cap. 318 of the Laws of Malta).</p> <p>5) Increased Severe Disability Pension – ISDA – eligible persons are those who suffer from a severe disability which impedes them from engaging in any kind of gainful occupation. ISDA is neither means nor capital tested.</p>

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

MALTA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>At-risk of poverty rate for population living in (quasi-)jobless households is worse than the EU average [2]</p> <p>Persistent at-risk-of-poverty rate for total population and for children (aged 0-17) is worse than the EU average [2]</p> <p>Income interquintile share ratio S80/S50 is worse than the EU average [2]</p> <p>Housing cost overburden (0-17) is worse than the EU average with some negative development [9]</p> <p><i>Persons with disabilities experience higher risk of poverty or social exclusion and substantial employment gaps.</i></p>	<p>The at risk of poverty or social exclusion rate (18-64) is better than the EU average and with some positive development [7]</p> <p>The share of adults (aged 18-64) living in a household suffering from severe material and social deprivation is better than the EU average and with some positive development [7]</p> <p>The shares of people (aged 0-64), children (aged 0-18) and adults (aged 18-64) not students living in (quasi-)jobless households are substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p>Impact of social transfers (excluding pensions) is worse than the EU average [2] in reducing poverty and working age poverty (18-64). Impact of social transfers (including pensions) in reducing poverty and child poverty is substantially worse than the EU average [1], also in reducing working age poverty (18-64) [2]</p> <p>At-risk-of poverty rate of children living in household in very low work intensity and at work intensity between 0.2 and 0.55 is worse than the EU average [2]</p> <p><i>There are limited gaps in formal coverage, as well as challenges related to effective access to and relatively low adequacy of social protection</i></p>	
3. Pensions	<p>People at risk of poverty or social exclusion (aged 65+) is worse than the EU average [2] for the total population of men and women and for women, and substantially worse than the EU average [1] for men</p> <p>At-risk-of poverty rate of older people (aged 65+) is substantially worse than the EU average [1] for the total population of men and women over 65 and for men (over 65) and worse than the EU average [2] for women (over 65)</p> <p>Median relative income of elderly people (65+) is substantially worse than the EU average [1]</p> <p>Persistent at-risk-of-poverty rate (aged 65+) is substantially worse than the EU average [1]</p> <p><i>The gender pension gap for people aged 65-79 is very high</i></p>	

4. Long-term care		
5. Health		Healthy life years at 65 for men and Healthy life years at birth for both man and women are substantially better than the EU average [3]

NETHERLANDS

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the population at risk of poverty or social exclusion (AROPE) by 163,000 by 2030

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMDS - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMDS), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, SMDS and Child AROPE; 2019-2023 change not significant for AROPE, SMDS, (quasi-)jobless HHs and Child AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

AT	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat database table une_rt_m
	Unemployment benefit
definition	Unemployment Benefit recipients ; Unemployment assistance recipients
unit	Thousands of recipients
source	Public Employment Service Austria (AMS)
comment	An unemployed person is defined as someone without employment who has registered as seeking work with the public employment service (AMS) and is both willing and able to work. Claims for transfer payments can only be made by those who have made employment insurance contributions for an appropriate period. For example, those who have interrupted their working careers for a long period of time (in particular returners) and school leavers receive no unemployment insurance benefit. In order to receive benefit a person must be registered with the AMS. To be entitled to claim unemployment benefit, a person must be able and willing to work, available for work but unemployed and have been in insured employment for the appropriate qualifying period. Unemployment assistance, which is payable on expiry of entitlement to unemployment benefit, combines the principles of social insurance and welfare. Firstly, the rate of the income support is calculated on the basis of the unemployment benefit previously received. Secondly, applicants must be in serious need of financial support, after taking exemption limits into account.
	Social assistance benefit/means-tested minimum income/minimum income
definition	Number of recipients of Social Assistance Benefits (until 08/2010)/means-tested minimum income (09/2010 – 12/2016)/minimum income (since 01/2017) resp. social assistance (since 06/2019)
unit	Quarterly data (changes in % to the previous year)
source	Social Departments of the Federal Provinces
comment	Social assistance is defined, implemented and administered by the Federal Provinces (Bundesländer); according to the Austrian Constitution each province has its own Social Assistance Act. Before September 2010, provincial legislation on social assistance had not been harmonised to a large extent. Quarterly figures of recipients of Social Assistance Benefits include between six and nine Federal Provinces; the data of the cities with municipal departments is missing in one of them. The provinces had registered very diverse trends. In order to realize the objective of combating poverty in all relevant fields of policy, a means-tested minimum income had been introduced as a reform of the social assistance scheme in 2010. The federal government and the provincial governments had agreed on common salient points of a nationwide means-tested minimum income scheme which had been subsequently implemented in the corresponding national and provincial legislation ("agreement between the Federation and the Federal Provinces about the means-tested-minimum-income scheme (BMS) pursuant to Article 15a of the Austrian federal constitution"). On the 1st of September 2010 the laws for the means-tested minimum income were introduced in 7 of 9 federal provinces. The remaining two provinces had introduced the minimum income scheme until October 2011. - Due to the nationwide introduction of the means-tested minimum income scheme, the comparison was started anew in 2012 (see table 2). At the end of 2016, the agreement between the Federation and the Federal Provinces about the means-tested-minimum-income scheme has expired. Since January 2017, minimum income has been solely legislated and administered by the Federal Provinces again. As a result, regulations concerning entitlement and the level of benefits can differ across Federal Provinces. In March 2019, Austria passed a government bill to reform the means-tested minimum income scheme. Since 1st of June 2019 the Principle law for social assistance is in force. The law does not only contain binding requirements, which have to be implemented by the Federal Provinces, but also a number of "optional provisions". Until now 7 of 9 provinces have implemented the reform.

	Disability benefit
definition	Disability benefit recipients
unit	Thousands of recipients
source	Main Association of Austrian Social Security Institutions (HVSV)
comment	Figures do not include people who reached statutory retirement age due to comparability reasons; the data until January 2011 represent an estimation, because the calculation of the accurate share of disability pensioners only existed for one month (December).

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

AUSTRIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>At-risk-of poverty rate for the total and the working age population is around the EU average with some negative development [9]</p> <p>At-risk of poverty rate for the population living in (quasi-)jobless households is around (slightly above) the EU average with some negative development [9]</p> <p>The persistent at-risk-of-poverty rate is around the EU average with some negative development for the total population and the working age population [9] with substantially negative development for children [10]</p> <p>The income interquintile S80/S20 and S80/S50 ratios are around (slightly below for the S80/S20) the EU average with some negative development [9]</p> <p><i>There is a high risk of poverty or social exclusion among non-EU born people</i></p>	
2. Effectiveness of social protection		
3. Pensions	<p>The risk of poverty or social exclusion rate of older people (aged 65+) as well as their risk of poverty rate are around the EU average with some negative development [9]</p> <p>The aggregate replacement ratio (excluding other social benefits) is around (slightly below) the EU average with some negative development [9]</p> <p>The median relative income of elderly people (65+) is around (slightly above) the EU average with some negative development [9]</p>	
4. Long-term care		
5. Health	<p>Life expectancy at birth and at 65 for the total population, men and women is around (slightly above for at birth for the total population and males and for at 65 for males, slightly below for at birth for women and for at 65 for total population and women) the EU average with some negative development [9]</p>	

Poland

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 1,500,000 by 2030, and of children at risk of poverty or social exclusion by 300,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE; 2019-2023 change not significant for AROPE, SMSD, (quasi-)jobless HHs and Child AROPE.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

POLAND 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	Persistent at-risk-of-poverty rate is around the EU average and with some negative development also for the working age population [9]	The rates of people (aged 0-64), children (aged 0-17) and adults (aged 18-64 not students) living in (quasi-)jobless households are substantially better than the EU average [3]
2. Effectiveness of social protection	<i>There are gaps in access to some branches of social protection</i>	<p>Impact of social transfers (including pensions) in reducing child poverty is substantially better than the EU average [3]</p> <p>At-risk-of poverty rate of children living in household in very low work intensity is better than the EU average and with some positive development [7]</p>
3. Pensions		
4. Long-term care	<i>Access to quality long-term care services, especially home care, remains a challenge</i>	
5. Health	<p>Life expectancy at birth is worse than the EU average and with some positive development [4]</p> <p>Life expectancy at 65 is worse than the EU average and with some positive development [4] for the total population and men, and worse than the EU average [2] for women.</p> <p>Potential years of life lost is worse than the EU average [2]</p> <p>Treatable mortality standardized rate is worse than the EU average [2]</p> <p>Preventable mortality is worse than the EU average [2]</p> <p>Unmet need for medical care for waiting and distance is around (slightly above) the EU average and with some negative development [9]</p>	

Portugal

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 765,000 by 2030,
and of children at risk of poverty or social exclusion by 161,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE and SMSD; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

PT	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat
link	https://appsso.eurostat.ec.europa.eu/nui/submitViewTableAction.do
	Unemployment benefit
definition	"Unemployment + social unemployment" beneficiaries
unit	Thousands of recipients /benefits paid (households)
source	Institute for Informatics and Statistics of Social Security
link	http://www4.seg-social.pt/estatisticas
comment	Entitlement to Unemployment Benefit for workers resident in national territory covered by the general social security scheme for employed depend on the following conditions: to be capable of and available for work; to be involuntarily unemployed; to be registered as a job seeker at the local Employment Office; to fulfill the qualifying period – to have completed, at least, 360 days with registered earnings within the 24 months immediately prior to unemployment situation. Regarding Social Unemployment Benefit, conditions are the same but it is also subject to means testing and it is granted in case workers have not completed the qualifying period required for UB: i) initial social unemployment benefit, to have completed at least 180 days with registered earnings within the 12 months prior to unemployment; ii) Subsequent social unemployment benefit, to have exhausted entitlement period for UB.
	Social assistance benefit/means-tested minimum income
definition	"Social assistance / Social Integration Income" beneficiaries
unit	Thousands of recipients
source	Source: Institute for Informatics and Statistics of Social Security Link: http://www2.seg-social.pt/left.asp?02.21.03.09.02
link	http://www4.seg-social.pt/estatisticas
note	Important changes were introduced in the Portuguese Means-Testing Scheme, firstly through Statutory Decree 70/2010 of 16 June 2010, then through Statutory Decree 133/2012 of 27 June 2012, redefining non-contributory social benefits entitlement conditions, namely those concerning Social Integration Income - RSI (Portuguese minimum income scheme) and more recently through Statutory Decree no. 90/2017 of 28 July by approving legislative changes, in order to reassess the requirements, general conditions for the granting and renewal of the RSI and also standardize the concept of household, reinforcing the integrative and inclusive capacity of this social benefit . The Statutory Decree 1/2016 of 06 January changed again the equivalence scale for income evaluation (1 for the first adult (aged 18+); 0.7 for each additional adult; 0.5 for each child) and increased the reference value by 25%. Additional increases took place in 2017 and 2019.
comment	The benefit paid by Social Security corresponds to a differential between the individual's income and a minimum income threshold taken as the baseline. This minimum income is indexed to IAS, an indexation mechanism for social supports that replaces the national minimum salary as a reference for calculating and adjusting pensions, benefits and contributions. Individuals and families who want to have access to this benefit, have to fulfil a number of conditions: legal place of residency in Portugal; aged 18 or over , availability for employment, occupational training or integration activities; not having earnings of one's own or from the family superior to minimum income established by law.
	Disability benefit
definition	"Disability pension + Disability social pension"
unit	thousands of recipients
source	Institute for Informatics and Statistics of Social Security
link	http://www4.seg-social.pt/estatisticas

Note	Disability or Invalidity pension: is a monthly cash benefit designed to protect the insured persons covered by all the social security schemes against permanent incapacity for work.
comment	<p>Entitlement to Disability Benefit under the general social security scheme depends if an employee or a self-employed is considered to be in a situation of permanent incapacity to work. A worker is considered to be in a situation of relative incapacity when, due to a permanent incapacity, one is not able to earn more than one-third of the earning corresponding to the regular practice of their activity. A worker is considered to be in a situation of absolute incapacity when one has a permanent and definite incapacity for all kinds of jobs.</p> <p>Disability pension is not payable if the invalidity is the result of an accident at work or occupational disease or if the person is entitled to an old-age pension, and is determined according to the number of years of contributions, the average monthly earnings and the sustainability factor.</p> <p>Social disability pension is also subject to a means testing condition.</p> <p>In January 2018, those who have a social disability pension transitioned to the social benefit for inclusion (new benefit)</p>

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

PORTUGAL 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>At-risk-of poverty rate is around the EU average and with some negative development [9] for the total population and with substantial negative development [10] for adults (aged 18-64)</p> <p>Children (aged 0-17) living in (quasi-)jobless households is around (slightly below) the EU average and with substantially negative development [10]</p> <p>At-risk of poverty rate for population living in (quasi-)jobless households is worse than the EU average [2]</p> <p>The income interquintile ratios S80/S20 and S80/S50 are worse than the EU average [2]</p> <p>Housing deprivation is substantially worse than the EU average [1]</p> <p><i>High risk of energy poverty</i></p>	
2. Effectiveness of social protection	<p>Impact of social transfers (other than pensions) in reducing poverty and child poverty is substantially worse than the EU average [1] and worse than the EU average in reducing working age poverty [2]. Impact of social transfers (including pensions) in reducing child poverty is worse than the EU average [2]</p> <p>At-risk of poverty rates for working age population (18-64) living in very low work intensity households are around the EU average and with substantially negative development [10] and worse than the average for children [2] living in household at work intensity between 0.55 and 1 [2]</p> <p><i>Low adequacy of minimum income</i></p> <p><i>There are gaps in access to social protection</i></p>	
3. Pensions	Aggregate replacement ratio (excl other social benefits) is around (slightly above) the EU average and with substantially negative development [10]	
4. Long-term care	<i>While improving, there is still insufficient access to long-term care services, which face increasing demand in view of demographic projections, and where public spending is below the EU average.</i>	
5. Health	<p>Healthy life years at birth for women is worse than the EU average [2] and their healthy life years at 65 is worse than the EU average with some positive development [4]</p> <p>The interquintile gap in unmet need for medical care (Q1-Q5) is around the EU average and with substantially negative development [10] in particular in unmet needs due to cost [10]</p>	

ROMANIA

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 2,532,000 by 2030
and of children at risk of poverty or social exclusion by 500,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROP; 2019-2023 change not significant for (quasi-)jobless HHs and Child AROPE.

Note: The total figures of social expenditure include all benefits excluding administrative costs.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

RO	Unemployment
definition	Unemployment according to ILO definition - Total.
unit	Thousands of persons unemployed - seasonally adjusted
source	National Institute of Statistics.
link	http://ec.europa.eu/eurostat/web/main (Eurostat Indicator une_rt_m)
comment	<p>The entire data series was estimated based on the resident population figures - consistent with the Population and Housing Census 2011 results.</p> <p>Data revision policy: The unemployment rate and the number of unemployed are disseminated on a monthly basis as provisional data and are subject to quarterly revisions as new information becomes available, namely:</p> <ul style="list-style-type: none"> - the indicators whose reference period is January, February or March are published as provisional indicators at the end of February, March or April and are revised in May; - the indicators whose reference period is April, May or June are published as provisional indicators at the end of May, June or July and are revised in August; - the indicators whose reference period is July, August or September are published as provisional indicators at the end of August, September or October and are revised in November; - the indicators whose reference period is October, November or December are published as provisional indicators at the end of November, December or January (next year) and are revised in February – next year. <p>Each year, once the data for the first month of the year are published, seasonally adjusted and trend series are entirely revised due to re-estimation of the parameters of the ARIMA model.</p> <p>A new framework regulation for European statistics relating to persons and households, based on data at individual level collected from samples (Regulation (EU) 2019/1700 of the European Parliament and of the Council of 10 October 2013) entered into force in 2021. Together with the delegated and implementing regulations issued in its application, it provides the new legal basis for the Labour Force Survey (AMIGO) as well as for the research "ILO Monthly Unemployment". These legislative changes provide several important methodological changes and may have a noticeable impact on the survey estimates. For this reason, the data published for the months of 2021 are not comparable with those published for previous periods.</p>
	Unemployment indemnity
definition	Number of unemployment indemnity recipients (indemnizație de șomaj), according to the Law No. 76/2002 regarding the unemployment insurance system and employment stimulation, with subsequent amendments
unit	Thousands of unemployed persons beneficiaries of unemployment indemnity
source	National Agency for Employment, Romania

	Social assistance benefit/means-tested minimum income
definition	"The recipients of the social benefit are families and single persons earning less than a certain amount set depending on the family structure. The legislation provides a set of assets that may exclude some families from benefitting of this type of income. The social benefit is equal to the difference between the amount set by the Law and the family income. Until January 2024, the social benefit (ajutor social pentru asigurarea venitului minim garantat) was granted as to Law no.416/2001 on guaranteed minimum income, with subsequent amendments. Starting with February 2024 the social benefit (ajutor de incluziune) was granted as to Law no.196/2016 on minimum inclusion income (Law no.416/2001 was repealed)."
unit	Thousands of households recipients of social benefit
source	Ministry of Labour and Social Solidarity, Romania; National Agency for Payments and Social Inspection, Romania
link	http://www.mmuncii.ro/j33/index.php/ro/transparenta/statistici/date-statistic

	Invalidity pension
definition	A person who is certified as being incapable for suitable fulltime or regular part-time employment due to a serious disease or bodily or mental impairment is entitled to an Invalidity pension (pensie de invaliditate), subject to the relative contribution conditions, as to the Law no. 263/2010 on the Unitary System of Public Pensions, with subsequent amendments.
unit	Thousands of pensioners beneficiaries of invalidity pension
source	National House of Public Pensions, Romania
link	http://www.mmuncii.ro/j33/index.php/ro/transparenta/statistici/date-statistice
	Disability benefit
definition	Definition of persons with disabilities: persons which, due to social environment inadequate to their physical, sensory, psychic, mental and/or associated impairment, are totally prevented or have limited access with equal chances to the society life, needing protection measures for social integration and inclusion, as to the Law no.448/2006 on social protection and promotion of the persons with disabilities rights, with subsequent amendments.
unit	Thousands of persons recipients of complementary personal budget for persons with severe, major or average disability (buget personal complementar pentru persoane cu handicap grav, accentuat sau mediu), according to the Law 448/2006 on social protection and promotion of the persons with disabilities' rights.
source	Ministry of Labour and Social Solidarity, Romania; National Agency for Payments and Social Inspection, Romania

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

ROMANIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The risk-of poverty rates of children (aged 0-17) and adults (18-64) are substantially worse than the EU average [1], as well as the risk of poverty rate for population living in (quasi-)jobless households, the relative median poverty risk gap [1] and the persistent at-risk-of-poverty rate of children (0-17) [1].</p> <p>The income interquintile share ratio S50/S20 is substantially worse than the EU average [1]</p> <p><i>The risk of poverty or social exclusion rate for persons with disabilities remains a challenge.</i></p> <p><i>Poverty and housing deprivation are very high for Roma people, particularly affecting children, in a context of high urban/rural inequalities and regional disparities.</i></p>	People (aged 0-64) living in (quasi-)jobless households is substantially better than the EU average [3]
2. Effectiveness of social protection	<p><i>Children from a disadvantaged socioeconomic background face a high risk of inequality of opportunities</i></p> <p><i>Challenges remain concerning the minimum inclusion income, comprising the low coverage and effectiveness of social services, while access to social protection is limited, in particular for workers without a standard employment contract.</i></p> <p>Impact of social transfers (excluding pensions) in reducing poverty, child poverty, and working age poverty and the impact of social transfers (including pensions) in reducing child poverty are substantially worse than the EU average [1].</p> <p>The relative median poverty risk gap of children (0-17) is substantially worse than the EU average [1], well as their risk-of poverty rate of children living in household at work intensity between 0.2 and 0.55 [1], and it is worse than the EU average when in households in very low work intensity [2]</p> <p>In-work poverty (18-64) is substantially worse than the EU average [1] and the risk of poverty rate for adults (18-64) living in very low work intensity households is substantially worse than the EU average [1], as well as their relative median poverty risk gap (18-64) [1].</p>	
3. Pensions	Relative median poverty risk gap (65+) is substantially worse than the EU average [1]	

4. Long-term care	<i>Insufficient access to long-term care services leads to high unmet needs</i>	
5. Health	<p>For both men and women, healthy life years at birth is worse than the EU average [2], while healthy life years at 65 is substantially worse than the EU average [1]</p> <p>Potential years of life lost is substantially, treatable mortality standardized rate and preventable mortality are substantially worse than the EU average [1]</p> <p>Unmet need for medical care is substantially worse than the EU average [1] when the reason is cost, and it is worse than the EU average [2] when the reason is distance. The interquintile gap in unmet need for medical care (Q1-Q5) is worse than the EU average [2], substantially worse than the EU average [1] when the reason is cost, and worse than the EU average [2] when the reason is distance.</p>	

SLOVENIA

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 9,000 by 2030, and of children at risk of poverty or social exclusion by 3,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, (quasi-)jobless HHs and Child AROPE; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

SI	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat (une_rt_m), monthly series https://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=une_rt_m&lang=en
	Unemployment benefit
definition	Unemployment benefit is an insurance based benefit that can be claimed by the unemployed who was employed (insured) before for at least 9 months in the last 24 months and did not lose the job by own fault. Statutory basis for unemployment insurance is Labour Market Regulation Act (Official gazette RS, no. 80/2010, 40/2012-ZUJF, 21/2013, 63/2013, 100/2013, 32/2014 – ZPDZC-1, 47/2015 – ZZSDT and 55/2017).
unit	thousands of recipients

comment	Online information only in national language.
	Social assistance benefit/means-tested minimum income
definition	Financial social assistance is a means-tested social benefit which acts as a final safety-net, intended to cover the basic living costs. Financial social assistance is defined by the Social Benefits Act (Official Gazette RS no. 61/2010, 40/2011, 110/2011-ZDIU12, 40/2012-ZUJF, 14/2013, 56/13 – Zštip-1, 99/13, 14/15 ZUJFO, 57/15, 38/16 – odl.US, 51/16 – odl.US, 88/16, 61/17 – ZUPŠ, 75/17) and the Exercising the Right to Public Funds Act (Official Gazette RS, no. 62/2010, 40/2011, 40/2012-ZUJF, 14/2013, 99/2013).
unit	thousands of recipients, total number of persons in the household
source	Ministry of Labour, Family, Social Affairs and Equal Opportunities https://www.gov.si/podrocja/socialna-varnost/socialne-pomoci-subvencije-in-znizana-placila/
comment	The numbers given are the numbers of individual recipients (including children). In the structure of households receiving financial social assistance, there are around 45 % of single households, around 8 % of adult couples and around 47 % of families (with children) (data for 2020).
	Disability benefit
definition	Disability benefits beneficiaries – Number of unemployed persons receiving disability benefits. Included are recipients of disability benefit, temporary benefit, partial disability pension/partial benefit, benefit for occupational rehabilitation, before and during retraining benefit and before employment benefit.
unit	thousands of recipients
source	Pension and Disability Insurance Institute of Slovenia

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

SLOVENIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>At-risk of poverty rate for population living in (quasi-)jobless households is substantially worse than the EU average [1]</p> <p>Housing deprivation (65+) is worse than the EU average [2]</p> <p><i>The risk of poverty and social exclusion for persons with disabilities is a challenge.</i></p>	<p>At-risk-of poverty or social exclusion rates for the total population, working age population (18-64) and children (0-17) are substantially better than the EU average [3]</p> <p>At-risk-of poverty rate of children (aged 0-17) is substantially better than the EU average [3]</p> <p>The rates of people (aged 0-64), children (0-17), and adults (18-64) not students living in (quasi-)jobless households are substantially better than the EU average [3]</p> <p>The income interquintile ratios S80/S20 and S80/S50 are substantially better than the EU average [3]</p> <p>Material and social deprivation for children (0-17) and for adults (18-64) is substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p><i>Children from a disadvantaged socio-economic background, namely those with low-educated parents, face a higher risk of poverty or social exclusion.</i></p> <p>Impact of social transfers (excluding pensions) in reducing poverty and working age poverty (18-64) is around the EU average and with substantially negative development [10]. The impact of social transfers (including pensions) in reducing poverty is around the EU average and with some negative development [9]</p> <p>At-risk-of poverty rate of children living in a household in very low work intensity is substantially worse than the EU average [1], and living in a household at work intensity between 0.2 and 0.55 is worse than the EU average [2]</p> <p>At-risk of poverty rate for population living in very low work intensity households (18-64) is substantially worse than the EU average [1]</p>	
3. Pensions	Aggregate replacement ratio (excluding other social benefits) is worse than the EU average [2]	
4. Long-term care		

5. Healthcare	<p>Child mortality, 1-14 is worse than the EU average [2]</p> <p>Unmet need med care - waiting is worse than the EU average [2]</p>	<p>Healthy life years at birth for women is better than the EU average and with substantially positive development [8]</p> <p>Healthy life years at 65 is better than the EU average and with substantially positive development [8]</p>

SLOVAKIA

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 70,000 by 2030, and of children at risk of poverty or social exclusion by 21,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMDS - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMDS), the reference is the current year. (iv) 2022-2023 change not significant for Child AROPE; 2019-2023 change not significant for SMDS.

comment	<p>Softer eligibility criteria on unemployment benefit came into effect since 1 September 2010. This change also contributed to year-on-year growth in the number of recipients from the second half of 2011 and till the end of the first quarter of 2012, but without any dramatic changes. The stable position in 2016 was followed by a year-on-year decline in the number of recipients in 2017. Softer and unified conditions on unemployment benefit have been implemented since 1 January 2018 - necessary 2 years of contributions from the last 4 years and maximum length of receiving at 6 months are applicable both for permanent and fixed-term contracts. Due to the softer and unified conditions a growth trend in the numbers of beneficiaries began since July 2018 and continued in 2019 and 2020 (Jan-Mar). Significant growth of recipients could be seen since May 2020 as the consequence of the Covid pandemic and temporary prolonging of maximum duration for receiving unemployment benefit. Since October 2020 a decline has occurred as the consequence of the temporary prolonging of maximum duration expiring on 31 August 2020. Due to the second temporary extension of benefit duration on receiving unemployment benefit (that entered into force on 19 March 2021) significant growth of beneficiaries could be seen from April to June 2021. Since July 2021 decline has occurred as the consequence of the temporary prolonging of maximum duration expiring on 31 May 2021. Since January 2023 the situation has looked stable with slight year-on-year growth until December 2023, followed by a mixed picture in the beginning of 2024. (Note: Unemployment Benefits are paid one month backward (benefits paid in July represent June claims)).</p>
	Social assistance benefit

comment	<p>Social Assistance Benefit: Recipients are defined as recipients of benefits. In the system of assistance in material need (social assistance) we are talking about the recipient, which is the range of jointly assessed persons, i.e. individual, family with children, families without children, etc. This means that for one recipient of assistance in material need may be more of jointly assessed persons. In years 2016 and 2017 is continuing the decrease in the number of recipients of material need based on changes in the system of assistance in material need applicable from 1 January 2015. The change was according better motivation start to work for long-term unemployed or inactive person. This trend continued in the second half of 2017 and 2018 as a result of the changes introduced since 1 May 2017 in the system of social assistance to increase motivation to start work for long-term unemployed or inactive people. At the beginning 2019 the number of beneficiaries was stable.</p> <p>Since 1 April 2019 some changes introduced in the system of social assistance had an impact on the beneficiaries, the decrease in recipients of assistance in material need continues and since September 2019 the situation is stable. Growth of recipients could be seen since May 2020 as the consequence of the Covid pandemic. It is necessary to add that Social Assistance Benefit is paid one month backward (benefits paid in May represent April claims).</p>

comment	<p>Since October 2020, the situation is similar to the situation before the Covid pandemic and the declining trend continues. In 2021 the declining trend still continues and since May to December the situation looks stable. At the beginning of 2022, the situation did not change. In the months of April and May, the impact of the influx of emigrants from Ukraine to Slovakia was reflected in the development of aid recipients of assistance in material need. Due to the availability of UNHCR international assistance for the aforementioned group of persons since May, this group was no longer part of the system of assistance in material need from June to September 2023. After the termination of the provision of financial assistance by UNHCR, this group was re-integrated into the system of aid in material need, which was reflected in the growth of the number of recipients of assistance in material need from October 2022. In 2023, some conditions for the right to assistance in material need were modified, which did not have a significant impact on the decrease or increase in recipients of assistance in material need.</p>
Disability benefit	
definition	Disability benefit recipients on monthly base
unit	The number of recipient persons in thousands
source	Social Insurance Agency
link	-
comment	<p>The number of recipients are without disability benefits from youth ("invalidi z mladosti") which are funded by state budget. The new lighter conditions on disability benefit have come into effect since 1 January 2010 (the minimum pension period on invalidity benefit is required from all career, not only from last 10 years). This change also contributed to the year-on-year slightly increased of the number of recipients from Year 2011 to 2015, but without any dramatic changes. In 2016 trend could be considered as stable and then followed by slight year-on-year growth in the number of recipients in year 2017. Oppositely, in the first half of 2018 slight year-on-year decline occurred, followed by stable trend in the second half of 2018 and this had continued in 2019 and 2020. Slightly decline of beneficiaries occurred from February 2021 to June 2022 due to higher number of disability benefits reclassified to old-age pensions and death of beneficiaries. Since January 2023 situation has looked stable with soft declines.</p>

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

SLOVAKIA 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>Children at-risk-of poverty or social exclusion (aged 0-17) the EU average and with substantial negative development [10]</p> <p>The risk-of poverty rates for total population, children (0-17) and adults (18-64) is around the EU average with substantial negative development [10] and it is substantially worse than the EU average for population living in (quasi-)jobless households [1]</p> <p>Severe material and social deprivation rates and material and social deprivation rates are around the EU average with substantial negative development [10] also for children (0-17)</p> <p>Relative median poverty risk gap is worse than the EU average [2]</p> <p>The income interquintile share ratio S50/S20 is worse than the EU average [2] and the S80/20 has substantially negative development despite being better than the EU average [6]</p> <p><i>Higher risk of poverty and social exclusion for Roma than for general population.</i></p>	<p>People (aged 0-64) and adults (18-64) not students living in (quasi-)jobless households is substantially better than the EU average [3]</p> <p>The income interquintile share ratio S80/S50 is substantially better than the EU average [3]</p> <p>Housing Deprivation for the total population and for adults (aged 18-64) is substantially better than the EU average [3]</p>
2. Effectiveness of social protection	<p><i>Children from a disadvantaged socioeconomic background face a high risk of inequality of opportunities</i></p> <p><i>Adequacy of minimum income support is low.</i></p> <p><i>There are challenges in access to social protection</i></p> <p>The relative median poverty risk gap for children (0-17) is worse than the EU average [2] and their risk-of poverty rate when living in a household in very low work intensity is substantially worse than the EU average [1]</p> <p>The rate of long-term unemployment is worse than the EU average [2], in-work poverty (18-64) is around the EU average and with substantially negative development [10], and the at-risk of poverty rate for working age population (18-64) living in very low work intensity households is worse than the EU average [2]</p> <p>Relative median poverty risk gap (18-64) is substantially worse than the EU average [1]</p>	
3. Pensions		Median relative income of elderly people (65+) is better than the EU average and with substantially positive development [8]

4. Long-term care	<i>There is insufficient access to long-term care services, in particular homecare</i>	
5. Health	<p>Life expectancy is worse than the EU average [2] at birth for the total population and men, and substantially worse than the EU average [1] at birth for women and at 65</p> <p>Healthy lifestyle at birth and at 65 is worse than the EU average and with some positive development [4]</p> <p>Potential years of life lost is worse than the EU average [2] while treatable mortality standardized rate, child mortality and preventable mortality are substantially worse than the EU average [1]</p> <p>Unmet need for medical care due to distance is substantially worse than the EU average [1] and the interquintile gap (between Q1 and Q5) is worse than the EU average [2]</p>	

FINLAND

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the total population at risk of poverty or social exclusion (AROPE) by 100,000 by 2030, and of children at risk of poverty or social exclusion by 33,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE; 2019-2023 change not significant for AROPE, AROP, SMSD, (quasi-)jobless HHs and Child AROPE.

TRENDS IN TAKE-UP OF SELECTED BENEFITS

FI	Unemployment
definition	Unemployment according to ILO definition - Total
unit	Thousands of persons - seasonally adjusted
source	Eurostat
	Unemployment benefit
definition	Earnings-related unemployment allowance; Basic unemployment allowance; Labour market support
unit	Thousands of recipients, at the end of the month
source	Social Insurance Institution and the Financial Supervisory Authority (FIN-FSA) for earnings-related unemployment allowance. Social Insurance Institution (Kela) for basic unemployment allowance and labour market support.
comment	Earnings-related unemployment allowance is paid for those who fulfil the eligibility criterias: Employment conditions and are member of an unemployment fund. This is voluntary, you have to pay an annual fee. In the case of unemployment the allowance is related to your salary. Basic unemployment allowance is like earnings-related allowance, but the difference is that you are not a member of an unemployment fund or do not qualify for the earnings-related allowance for some other reason. The basic allowance is flat rate and low. Starting from 2010, basic and earnings-related unemployment allowances are payable not only during unemployment but also during participation in a measure of active labour market policy. Labour market support is flat rate benefit (and low) for those who do not qualify for the eligibility rules of the benefits mentioned above. In practice they are young people and those who have received the allowances mentioned above for the maximum period (from 2017 on 300, 400 or 500 days). Unlike with the unemployment allowance, a demonstrated need of financial assistance is also required. Although in most cases labour market support and basic unemployment allowance are the same rate.
	Social assistance benefit
definition	Recipients of social assistance (households) by calendar month
unit	Thousands of recipients
source	National Institute for Health and Welfare (THL)
comment	Social assistance is the last-resort form of financial assistance. Social assistance can be paid to individuals or families who need support and whose other disposable means, such as income and assets, do not cover their essential daily needs. Social assistance is a means-tested benefit, and it is usually granted for one month at a time. Its amount is based on the client's essential expenses. The amount of social assistance is the difference between the client's disposable income and assets and the expenses that give eligibility for social assistance. Usually a social assistance recipient has other income, such as housing allowance, unemployment security or sickness allowance. In such cases, the social assistance granted is lowered by the amount corresponding to the client's income. In this sheet figures include the data (recipients=households) on basic social assistance (some 94,5 percent of all social assistance granted) as well as data (recipients=households) on supplementary and preventive social assistance (some 5,5, percent of all social assistance granted). Please see more of basic social assistance, supplementary social assistance and preventive social assistance: https://stm.fi/en/income-security/social-assistance .
	Disability benefit
definition	Recipients of disability pension (earnings-related schemes) at the end of the month
unit	thousands of recipients
source	Finnish Centre for Pensions

comment	<p>Disability pensions in the earnings-related pension system consist of full and partial pensions and they may be awarded until further notice or for a specific period of time. The proportion of partial pensions of all pensions has risen and is about 19 percent of all disability pensions. 26 percent of new disability pensions were partial pensions in 2023, which means that their proportion has decreased from the previous year.</p> <p>Rehabilitation allowance is a benefit paid during active rehabilitation measures awarded to a person who is still in working life and would face a risk of disability in the near future without rehabilitation. The amount of this allowance is 1.33 times the possible disability pension. Rehabilitation allowance is paid by the pension system, but it is not regarded or classified as a pension. The number of recipients of this allowance has increased at the same time as the number of disability pensions has decreased, but in the last five years also the number of people receiving rehabilitation allowance has decreased.</p> <p>The total number of people receiving disability pensions has been decreasing for over 10 years. There are several possible reasons for this. First, the incidence of new disability pensions has decreased in the most important diagnosis groups. They are applied less than before perhaps because of the ability to work has ameliorated, possibly because of increased rehabilitation measures. Larger number of disability pensions has ended, which is partly due to larger number of disability pensions granted for a specific period of time. Disability pensions also begin in older ages than before.</p> <p>The demographic factor also counts. The amount of people in age groups where the incidence of new disability pensions is highest (55 to 63) has decreased. However, from 2017, the lowest old age retirement age is rising 3 months each year, which has lead to increased number of disability pensioners in age group 60+.</p> <p>In the 2017 reform, also a new form of disability pension was legislated, which gives right to pension at 63 (for those whose retirement age is higher) if the person has faced hard work conditions for at least 38 years and has some kind of disability. This is not a pension for the masses. At the end of May 2024, the number of these pensions in payment was 171.</p>

Note: For the poverty threshold values, levels are shown in PPS, but changes are shown as changes in national currency terms and accounting for inflation.

KEY SOCIAL CHALLENGES AND GOOD SOCIAL OUTCOMES

FINLAND 2024

Social policy area	Key social challenge	Good social outcome
1. Poverty, social exclusion and inequality	<p>The rate of people at risk of poverty or social exclusion (18-64) is better than the EU average with substantial negative development [6]</p> <p>The rate of adults (aged 18-64) not students living in (quasi-)jobless households is around (slightly above) the EU average and with some negative development [9]</p>	<p>Child risk-of poverty or social exclusion (aged 0-17), risk-of poverty and persistent poverty rates are substantially better than the EU average [3, 3, 8]</p> <p>The rate of children (aged 0-17) living in (quasi-)jobless households is better than the EU average and with some positive development [7]</p>
2. Effectiveness of social protection	Impact of social transfers (including pensions) in reducing working age poverty (18-64) is around the EU average and with substantial negative development [10]	<p>Impact of social transfers (excluding and including pensions) in reducing child poverty is substantially better than the EU average [3]</p> <p>At-risk-of poverty rate of children living in household at work intensity between 0.2 and 0.55 is better than the EU average and with some positive development [7]</p> <p>In-work poverty (18-64) is substantially better than the EU average [3]</p>
3. Pensions		Relative median poverty risk gap (65+) is substantially better than the EU average [3]
4. Long-term care		
5. Health	<p>Life expectancy at birth and at 65 is around (slightly above for at birth, slightly below for at 65) the EU average and with substantial negative development [10]</p> <p>Healthy life years at birth are worse than the EU average and with some positive development for both men and women [4]</p> <p>Child mortality is worse than the EU average [2]</p> <p>Unmet need for medical care (costs, waiting or distance) and for waiting is substantially worse than the EU average [1] while the interquintile gap (Q1-Q5) in unmet need for medical care, in particular due to costs, shows some negative development [9]</p>	

Sweden

NATIONAL 2030 TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Reduce the population at risk of poverty or social exclusion (AROE) by 15,000 by 2030,
and of children at risk of poverty or social exclusion by 5,000

PROGRESS TOWARDS THE 2030 NATIONAL TARGET FOR THE REDUCTION OF POVERTY AND SOCIAL EXCLUSION

Source: Eurostat (EU-SILC)

Note: i) Progress to the target is monitored on the basis of the EU-SILC data with a base year 2019 and target data year 2030; ii) AROPE - at-risk-of-poverty or social exclusion; AROP - at-risk-of-poverty; (quasi-)jobless HHs - share of population living in (quasi-)jobless households, i.e. very low work intensity (VLWI) households; SMSD - severe material or social deprivation; iii) For the at-risk-of-poverty rate (AROP), the income reference year is the calendar year prior to the survey year. Similarly, the share of (quasi-) jobless households or the very low work intensity rate (VLWI) refers to the reference year prior to the survey while for severe material or social deprivation (SMSD), the reference is the current year. (iv) 2022-2023 change not significant for AROPE, AROP, SMSD and (quasi-)jobless HHs; 2019-2023 change not significant for AROPE, SMSD, (quasi-)jobless HHs and Child AROPE.
